introduction

Hello snackers and frens!

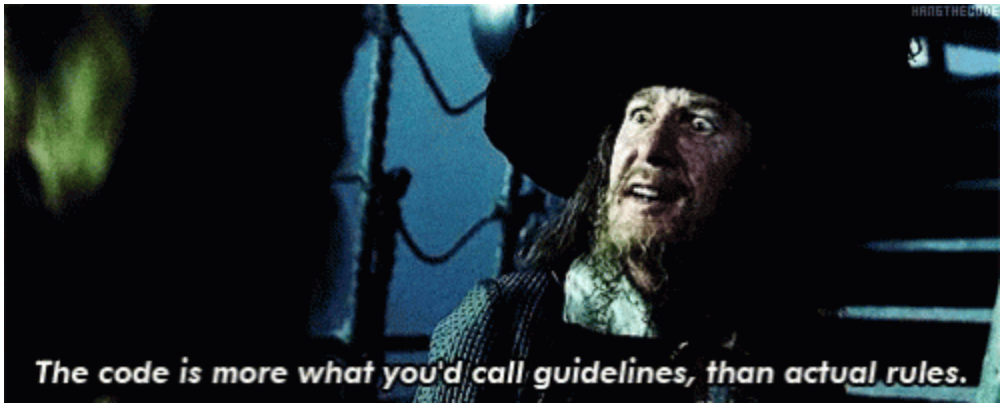
Welcome to the Filian ARG Living document! This is an ongoing informational project intended to solve the mysteries/puzzles related to the Filian ARG.

A very special thank you to our contributors & document editors for making this project what it is. And an extra special thanks to the mods, as always, for keeping communities safe and healthy.

One last thing before you go, we (Finite Emporium on discord + whoever comes after me) have a proposed set of guidelines for the members and players of the ARG with Google doc editing permissions!

Proposed guidelines for participants with doc editing perms;

1) Please add as much context as is needed to understand a statement/link/picture as this doc is for both active participants and potentially new parties
2) Please do what you can to credit all contributions, the arg is a community effort and most would feel its important to celebrate contributions it also helps to identify relevant parties should someone need be asked for further info/clarification or evidence of claims
3) Proposed format is after information like text or a photo add “(credits: **name/user name**, place ie discord)”
4) You are encouraged to read through all of the tabs before contributing information to the document - this may become challenging or impractical as the doc grows so this suggestion may be updated or removed in the future
5) It was discussed that incorrect/debunked information be struckthrough & solved or info proven correct should be highlighted(green/blue were proposed) - the primary reasoning for striking out instead of deleting is it saves the info for later rechecking & doesn’t remove the work put in by those who contributed it, as the work is part of the fun/play of the ARG it feels important to preserve those contributions even if they didn’t prove correct.
6) This is a **game**, please don’t try to get people into legal trouble by doing internet shenanigans



Summary & Status

TL;DR Summary of What is Happening and Current Status

Chronological order of confirmed events:

Hardcore marathon:

- Knocks and glitches were heard/seen throughout the video, and Filian gave concerned reactions to both.
- A glitchy video clip was played at the end of the marathon. In the visual glitches a youtube link was found leading to an unlisted video on the channel @isitreallyover

Unlisted Video:

- The video is a black screen with glitch effects. The title decrypts to "red herring".

@isitreallyover youtube channel:

- Channel description decrypts to "one day... in another life? maybe?" using a Caesar cipher.
- Channel pfp is a darkened image with a grid of numbers over a closeup of filian's eye decrypting to "I thought I had more time" using hexadecimal.

1st livestream:

- Pure black screen with miscellaneous sounds.
- The stream title started as a "." and was changed to "325113155552413553" Using the Polybius square cipher, then the Vigenère cipher with the default key on cryptii, this translates to "keep going"
- The stream description started with the word "its" in binary. a few hours in the word "happening" was added in binary with the “new line” character at the end.

2nd livestream:

- Aria Variata BVW 989 was looping with a black screen. There were intermittent periods of silence.
- Using the Enigma Machine cipher with all settings set to 1 (default on cryptii depending on how you access it) the title (jmksz o) translates to "resolc", or "closer" backwards.

3rd livestream:

- 3 day long pure black screen stream. First half was complete silence, second half was looping clair de lune.
- The title was 28 underscores. there was no description.
- Nothing confirmed was solved in this stream.

4th livestream:

- The stream was nearly black static with the song Didone Abbandonata looping. The title was again 28 underscores.
- The description started blank, but was eventually changed to 4999 backslashes.

- Temporarily the description had the following text in the middle of the backslashes: Now/ That you have everything/ keep looking
- There were beeps and typing/failure sound effects throughout the video which were eventually realized to be the pattern 6 22 22.
- A link to a discord server with the same glitched text from above was found in the description to a short on the Filian youtube channel posted on the date 6/22/22.

Discord Server:

- A soundboard found on the discord server had a spectrogram that showed 50.115.0.25 which turned out to be a minecraft server IP
- The discord server owner had a name that was 24 slashes. The name of the discord server is also 24 slashes. The owner's @ is _._.__.___.____.____.___.__._._

^^Possibly Ongoing

Minecraft Server:

- Server is in hardcore mode. The description initially read "find it".
- A clue was found on a pale oak sign reading "you can get them back. send the dead. ice is your friend"
- A command block protected altar was found in an ice spikes biome with signs written in galactic alphabet (enchanting table language) that decoded to: "If you want your fallen a sacrifice must be made. Place the head of the dragon at the top. Don't misunderstand, there is more to be found." Upon placing the dragon head all dead players were revived, and continued to revive for around an hour.
- A Reinforced deepslate box was found in the end containing a custom temple build and command block/barrier block protection. A sign was found inside with hex code written on it, which decoded led to a website "blackfile-index.org".
- The server description was then updated twice, first briefly reading "if only you knew how much more is out there", then changing again to "find. It."
- On Christmas the server was changed to normal survival instead of hardcore. The server returned to hardcore on the 26th.
- The server went down for maintenance on Feb 3rd with the message “Going offline into maintenance mode to work on lag. See you in a day!”. The server MOTD changed to “Currently under maintenance” in red, and “we’ll be back soon” in a beach gradient. The server has been down ever since.
- The server **returned** at some point before 9 am PST on Feb 28th, 2026
- On 3/17 a new structure was discovered using the solution to the konami code riddle on the website. Shortly after discovery the text “Remember” “Watch it.” “Protect it” “its coming.” was added through invisible armor stands to the sea lanterns on the corners of the structure.

^^ONGOING!

Website:

- The website is a near black static screen with green text saying "system ready" and a line to submit inputs. It looks sort of like a terminal.
- The typing sounds and failure sounds are the same as in the 4th livestream.
- Looking into the site code uncovered the input "THE_TRUTH" which initially led nowhere, but gave the text "ACCESS GRANTED"
- Inputting the text "help" into the terminal gives the output "There is no help for you here" implying there are additional undiscovered inputs.
- A "read me" page was found, and a countdown started ticking once every 24 hours. At the end of the countdown we were given the text:

  0kind
  It=stillnotfound
  Sacrifice.complete=true
  Initializing message...

  “If I’m lost, the backup coordinates can be found on Earth near where east meets west: An ancient sea bridge, an island between B and C, bodies both. I have a yankee sixth sense about it. Two ivory towns. Carry the cross into the Mine, just the whole numbers, sixty three times raise the parallel, just twice the long.”

- At that time, the input THE_TRUTH began redirecting users to a windows 95 desktop with several inaccessible files, and one password protected file.
- The file “Convo” was added on Feb 11th containing a conversation between “J” and “Me” discussing whether there were any updates on “the girl”, showing that they’ve noticed our access to the website/win95 desktop, and saying the docs are still protected, and the password hasn’t been found or shared.
- On 3/17 at 4:41 AM the website code was changed to include the konami code. Entering the konami code plays the music notes CBACG and brings up a new riddle:

  Three numbers lead to one place.

  Note but expect to be held to the letter of the law.

  You can count on it.

  How to Filter Water in the Wild.

  See?

  Lose 127.

  Catherine the great, Edward jenner, the wealth of Nations, The american revolution, the United states, the irish Rebellion, the seven Years war.

^^ONGOING!

Current Situation:

- A strange new structure was found on the minecraft server with the text “Remember” “Watch it.” “Protect it” “its coming.”. We are currently waiting for whatever “it” is to come.

ARG overview

ARG Start

End of Minecraft Hardcore (Part 7)
🔴 HARDCORE MINECRAFT MARATHON 🔴Stream ends when Neuro Vedal Crelly & Fi…
, Unlisted Initial Video URL was revealed for frame or two at the end:

During the minecraft marathon stream, Filian's screen would occasionally have a glitch effect, or a knocking sound could be heard. Neither effect was triggered by chat. Whenever this happened, Filian's expression would noticeably shift, usually followed by her saying some variation of the phrase: "I don't have much time."
Additional analysis in *The Filian ARG Document* *tab*

ARG Channel

Channel → https://www.youtube.com/@isitreallyover
Channel Name → time is up
Channel Handle → @isitreallyover
Channel PFP → "***i thought i had more time***" (ASCII hex code)
Channel Description → ***"one day… in another life? maybe?"*** (Caesar+7)
Additional analysis in *The Filian ARG Document* *tab*

Initial Video

The **Initial Video [https://www.youtube.com/watch?v=yKYgQrogPEI]**
Title: **:07 ‡0::.?*** → ***"red herring"*** (goldbug cipher, rot7/caesar)
Additional analysis in *The Filian ARG Document* *tab*

1st Livestream

The **1st Livestream [325113155552413553]** on the same channel started shortly after the Minecraft Marathon ended on 12/8/2025 PST. This stream ran just shy of 9 hours and 41 minutes.
Initial title: **.**
Current title: **325113155552413553** → ***"keepgoing"*** (vigenere and polybius cipher)
Description: **01101001 01110100 01110011** → ***“its”*** (binary ASCII)

01101000 01100001 01110000 01110000 01100101 01101110 01101001 01101110 01100111 00001010 → ***“happening\n”*** (binary ASCII)
The second line was added to the description later during the livestream.
Additional: Multiple sequences of audio are played during the livestream, see The Filian ARG Document tab for analysis

2nd Livestream

The **2nd Livestream [jmksz o]** on the same channel started a day later on 12/9/2025 PST. This stream ran just over 11 hours and 7 minutes.
Title: **jmksz o** → ***“closer”*** (Enigma machine, then reverse the output)
Description: \\\\

Title and description changed several times to hint that the audio sequence 6 22 22 was 6/22/22, which led to a YouTube short posted back on that day.
See The Filian ARG Document tab for analysis.

1st YouTube Short

The 1st YouTube Short [No stress, Just dance with the good vibes]
Title: No stress, Just dance with the good vibes
Description: I stream LIVE @ / filian Monday and Wednesday at 7pm PST/10pm EST and Saturday at 4pm PST/7pm EST if you want to say hi! Check out our ¢□~~mmu~~□~~ɟɣ~~ Discord! / discord IG: / filian.ttv TikTok: / filianvt Twitch: / filian #shorts
Additional: The corrupted 'community' in the description is followed by a Discord invite link: ***https://discord.gg/ZJ6aewaP*** *See The Filian ARG Document tab for analysis.*

Discord Server

Server name is //////////////////////// *(24 slashes, unknown)*
Created by user with profile name: _._._.__.___._____.___._.__._._ *(26 . and _, unknown)*
Additional: A voice channel was available and soundboard noises could be triggered, one of which had an IP address in the spectrogram leading to a Minecraft Server. Update: profile name changed to _._._.__.___._____.___._.__._.__09436 now. See The Filian ARG Document tab for analysis.

Minecraft Server

Hardcore Minecraft server named **find it** *(found sign decoding to blackfile-index.org in an admin constructed shrine in the End, but later the Minecraft server briefly renamed to indicate more)*
Additional: See The Filian ARG Document tab for analysis.

Blackfile Index

https://www.blackfile-index.org/ *(solution unknown)*
Additional: The password THE_TRUTH can be entered but led nowhere. After a countdown of 5 days in a readme file, the terminal is now accessible and a riddle appeared in the readme. See The Filian ARG Document tab for analysis.

Hardcore Minecraft Marathon

During filian's stream, knock sound effects and blocky visual glitches appear. After a glitch or knock, filian usually says something related to not having enough time, or having to finish on 'this run'. **Note:** this is *not* the same as the knocking bits redeem usually available, which shows when someone redeemed this, as nobody was seen redeeming these occurrences.

During visual glitches, the audio also plays a glitched out sound.
Timestamps originally compiled by **Mateon1st,**
redone again with links by **[PHG]Tristan1999HD**

Timestamps of all glitches during filian's stream (Youtube VODs)	
Part 1	
2:12:17 - 2:12:18	**Glitch** - “what the frick”
3:17:17 – 3:17:18	**Knock** (4) (----) - “what”
4:33:48 – 4:33:49	**Glitch** - “no! What the frick is going on?”
5:39:21 – 5:39:23	**Knock** (7) (-------) - “What the frick? What is going on?”
6:31:34 – 6:31:36	**Glitch** - “What is going on? Yo my junk’s glitching, what the frick? Hello am I good?”
8:10:09	**Glitch** - “Not yet man. Come on, not yet”
8:48:00	**Knock** (4) (-..-) - “no no please no come on, not now.”
10:22:12	**Glitch** - “come on”
Part 2	
00:01:24	**Knock** (4) (....) - “not yet man come on, no. Gotta hurry up.”
28:14	**Glitch** (big glitch) “Chat we’re running out of time. We’re running out of time guys holy frick, no”
Part 3	
1:23:27	**Glitch** (says „a world of your imagination“ right before) - “Oh Frick, oh nonono oh god. I don’t know if we’re gonna make it”
3:40:33/34	**Glitch** - “aw frick”
4:43:23	**Knock** (6) (------)
9:45:13	**Glitch** - “aw frick, oh frick”
11:17:08	**Knock** (4) (-..-)
~11:40:07	**Glitch** - “Guys we gotta win on THIS RUN”
Part 4	
1:56:34	**glitch** (big glitch) - “oh uh oh uh oh”
3:01:59	**Knock** (4) (....) - “ok we gotta finish this tonight, I am running out of time”
3:34:32	**Glitches** - “Oh no uh oh”
3:52:53	**Glitch** - “oh frick oh”
4:02:56	**Knock** (7) (-------)
Part 5	
3:11:55	**Knock** (7) (.....) - “we’re running out of time”

4:26:45	**Glitch** - “abelebelebele, I think this has gotta be the run, I am not long for this world”
5:38:45	User Annexes in world on join, instantly disappears (apparently Neuro’s Spectator account?)
8:28:23	**Glitch** - “uh oh, yeah I really hope this is the run, would be really nice”
9:53:24	**Glitch**
Part 6	
34:52	**Glitch** - “Broo, not yet. Please a little longer x3(pleading hands)”
Part 7	
▶🔴 HARDCORE MINECRAFT MARATHON 🔴Stream ends when Neuro Vedal Crel.	
2:21:46	Annexes joined the game (apparently Neuro’s Spectator account?)
3:12:25	**Glitch** (big glitch) - “you feelin’ alright? Yeah I think so, I just, I gotta hurry”
5:40:20	**Knock** (5) (-----) - “not yet”
5:51:28 5:51:54	**glitch** (big glitch) **glitch** (big glitch)
6:08:17	**Knock** (7) (.....)
6:19:24 6:32:21 6:36:38 6:41:43 6:50:39	**glitch** **glitch** (big glitch) **Knock** (5) (-----) **Glitch** - “oh man” **glitch**
End segment	Nothing
7:10:39 7:10:51 – 7:11:07 7:13:03 7:13:27 7:13:36 7:13:44 7:13:55 7:14:39 7:15:06 7:16:04 7:16:25 7:20:39 7:22:16 7:23:21 7:23:40 7:24:22 7:24:29 7:24:58 7:27:45	**Glitch** - “Holy frick bro” weird zoom on credits **Glitch** - “I’m outta time, I’m outta time. man” **Glitch** - “I gotta go soon” **glitch** **Glitch** **Knock** (-----) **Glitch-audio** - “uh oh” **Knock** (5) (.....) - “man” **Glitch** - “Guys I’m running out of time, I gotta go” **glitch** **glitch** **glitch** **Glitch** - “aw frick” **Knock** (4) (-..-) **Glitch** - “oh frick” **Glitch** - **Knock** (5) (-----) **Glitch** - “oh frick I’m outta time guys, I’m really glad we finished it in 4 days cause it’s not looking good”

7:28:10 7:28:21	**Glitch** - “what’s..? Oh frick” glitch/Transition
7:28:22-end 7:29:03	Prerecorded clip, including the glitch documented in the ARG start tab: “Umm… (breathing in)” “Ehh…” “I didn't think it would be this soon.” “It's happening!” (unintelligible; 'worl-' maybe?) “Uhh it's.. it's.. it's time for me to go for... for a little while.” “(unintelligible; 'I'll be there in ten'/'I'm running out of time' maybe?) I really gotta go!” (out of breath) “I didn't think you'd ever see me like this!” “Ehh..” “Whuuuuh…” “You'll be able to see the world.” “My world!” Knock (2) (--)

Timestamps in absolute time(part_time, absolute_time, seconds, type) by Makedonski

Unsolved: There are heart containers that glitch across the screen during the ARG intro that no one really caught. I initially thought it was just random junk, but you can actually see it glitching into several locations at around 7:28:45 in the stream. Not sure what this asset is from. Someone said it’s a minecraft half heart but doesn’t seem to match up. Could be just an artist rendition of it.

Initial Video

Link to video (unlisted) - https://www.youtube.com/watch?v=yKYgQrogPEI

Video Title:
The title of the initial video is "**:07 ‡0::.?***" which when put through a goldbug cipher, returns the string "***YLK OLYYPUN***," which when shifted through a *caesar cipher* returns the phrase "***red herring***" which is a phrase often used to describe a clue that is meant to be a distraction from the larger puzzle. (Solved by ***Gold_Complex*** on discord)

Solution: :07 ‡0::.?* -> Gold Bug Cipher -> ``ylk ollypun`` -> Caesar Cipher -> ``Red Herring``

Theory - Throughout the video the black screen gradually turns to purple. This was likely the main clue in the video. It was saying take the black photo (pfp) and raise the contrast to reveal the code. The code was in Filian's eye which is purple.

All frames are here (processed by Makedonski)
https://drive.google.com/drive/folders/1-NshvLgkTsxMMIA-rl9Nj8snmJx-WvTb?dmr=1&ec=wgc-drive-hero-goto

ARG Channel

Channel → https://www.youtube.com/@isitreallyover
Channel Name → time is up
Channel Handle → @isitreallyover
Channel Created on → December 5th 2025 (users have pointed out that is the same day the minecraft marathon started on)

The channel icon for ***time is up*** when brightened in an image editing software or via display settings shows a series of dark blobs over a filian's Twitch PFP eye. Opening the image URL directly and modifying the URL, replacing everything after **=** to `=s0-rp` gives a full size image in png format:
https://yt3.ggpht.com/py7QNjH4Tsd5B9EuHY-LnAcK6mj_X9TW5uml_pzM28K9pnN5_1aaV7AjgdAHlVTcEgSjJeXm8Rk=s0-rp
Brightening the full-size image reveals a string of numbers "***69 20 74 68 6f 75 67 68 74 20 69 20 68 61 64 20 6d 6f 72 65 20 74 69 6d 65***" which decodes via ASCII hex code to: "***i thought i had more time***". (Solved by *fluffblush*, and *mypandaisnamed* on discord)

Higher Quality Version (from *creeperfun12_yt* on Discord, originally Mateon1 in Twitch chat)

The background exactly matches the above image of filian. (credit: GeoScape in ARG discord)

Channel description (solved by Caesar+7)

vul khf... pu huvaoly spml? thfil?	one day… in another life? maybe?

1st Livestream

Link to stream: 325113155552413553

Timestamps:	
4:52-10:20	Binaural sinewave left=40hz right=47.83hz Rapid popping at start More popping at 5:45 Extra noises at 7:22-7:51 Popping at 8:31-10:20
11:47-12:37	Crowd noise, nothing decodable?
16:56-17:40	phone dial (DTMF tones)
21:30-29:30	wind noise?
40:36-1:11:58	cicada sounds
1:11:39	KNOCKING
1:59:46-7:10:42	Water bubbling sounds Seems like a loop of just under 5 minutes of audio
2:07:35 (roughly-ish)	STREAM TITLE UPDATE 325113155552413553 (Polybius: mvcezwqpx, vigenere[key: cryptii]: keepgoing)
6:22 Audio Glitch in bubbling noise (waveform cuts out).	might have been the original hint at the 6:22:22 short
7:11:22-7:12:52	Beeping (heart monitor?) 49 beeps audible, a loop of 15 beeps repeated
7:13:44-7:14:30	Minecraft stone footstep sounds: 4,11,10,6,11,10,6,11,10,1 Then silence. Description changed, now says “its happening” encoded in binary.

8:51:23-9:40:44 (end)	low ambiance (ominous) some minecraft noises (faint) every now and then? (I don't hear it) Wind ambiance is not a loop

Video Title: Started as "**.**", was eventually changed to "**325113155552413553**". Using the polybius cipher gives the text "**MVCEZWQPX**". Plugging the new string into a vigenere cipher with the default key on cryptii gives us "**keepgoing**". (solved by **ryab4ique** on discord)

Solution: 325113155552413553 >> polybius cipher >> MVCEZWQPX >> vigenere cipher >> keepgoing.

Description: The stream description translates to "itshappening" in binary

Binary:	**Text:**
01101001 01110100 01110011	`its`
01101000 01100001 01110000 01110000 01100101 01101110 01101001 01101110 01100111 00001010	`happening` - with a new line "\n" character at the end

Additional Info:

Livestream thumbnail is same image as channel pfp

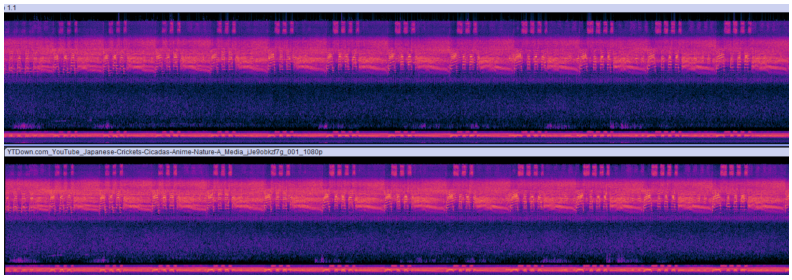
Binaural sinewaves also known as binaural beats are a pseudo scientific concept associated with areas like spiritual healing and similar alternative health topics. Within the stream were: left=40hz right=47.83hz this is considered a 7hz binaural beat user Stardrop on discord has noted this is a frequency associated with "healing" - that said the 7hz is on the Theta spectrum of brainwaves (4-8hz) and is related to deep relaxation, a meditative like state and creativity. It is also a prominent pattern seen in REM sleep and has been associated with rapid eye movement in sleep.
(Further research and analysis on this section has been performed by several users on discord including audio engineers and found no meaningful leads have been found)
(additional info researched and provided by Finite Emporium on discord)

Heart rate monitor beeping

Stock audio clip: https://www.youtube.com/watch?v=yEb4kojtVHw The video even has the same volume decrease and increase as the livestream. So this heart rate monitor probably has no encoding info.

[source: glaukopes (not a doctor just an experienced endurance athlete)]
 49 beats, but the 49th is very faded
 duration 1:27 or 87 seconds
 ~33 bpm
 33 bpm is abnormally low. A "normal" resting heart rate is usually said to be 60-80, but endurance athletes often have resting heart rates in the 50's or even 40's. Even for an endurance athlete, 33 would be extremely low.

Cicada noise: Confirmation that the cicada audio is the exact same as this Youtube clip https://www.youtube.com/watch?v=jJe9obkzf7g (found by @bloodyrose and cross referenced by @GeoScape on discord)



Minecraft steps

Stock audio for the minecraft steps was found on 2/2/26 by Random_Jawa on Discord: https://www.youtube.com/watch?v=4u8bCzEfxJM

See DTMF Analysis tab under 1st Livestream for further info on the DTMF portion

DTMF Analysis

1`Made a separate tab as this will continue to take up a lot of space and seems to be the only obvious puzzle we aren't close on. (Credit to **Mateon1st** on discord for the original faint tone analysis)

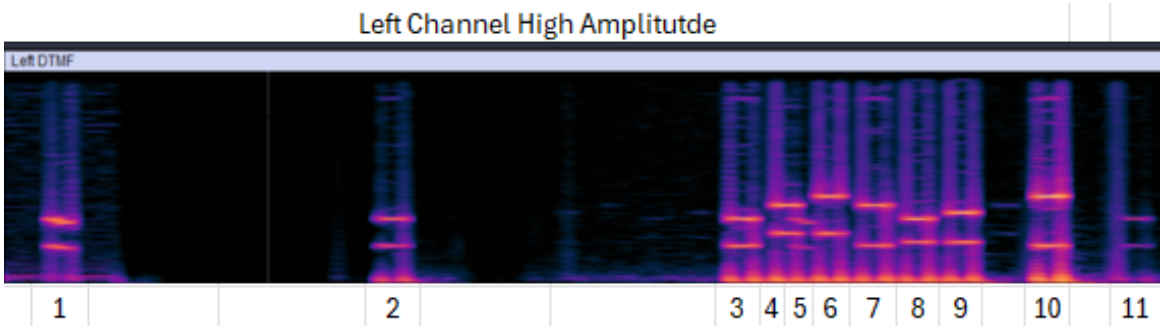
(1) is a 1 that lowers pitch halfway through

Full Message High Amplitude:
(1) 1 1#(1)D345 A 1#(1)D345 A (1) 1 1#D345 A
Full Message Low Amplitude:
5678 # *2345678* #
Full Message Combined:
(1) 1 *5678*1#(1)D345#A 1#(1)D345 A (1) 1*2345678* 1#D345 # A

Plain text:
High Amplitude: 111#1D345A1#1D345A111#D345A
Low Amplitude: *5678#2345678#*
Combined: 11*5678*1#1D345#A1#1D345A11*2345678*1#D345#A

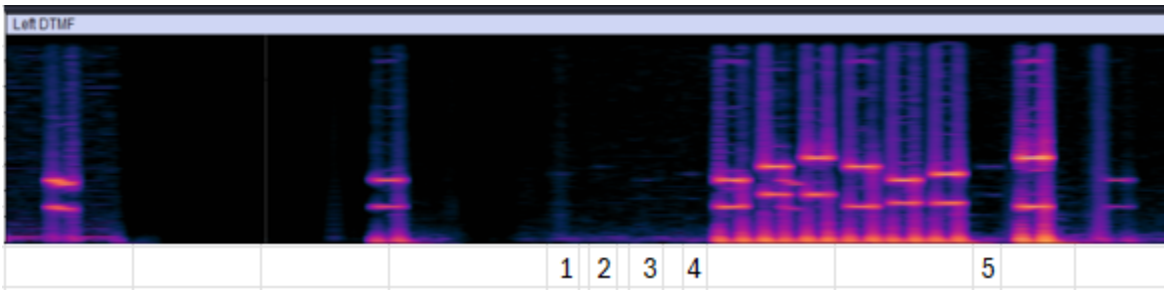
Left Channel DTMF FFT Analysis (**GeoScape** on Discord):

	DTMF DECODING Left Channel				
Position	Time Stamp	Low Hz	High Hz	DTMF	Notes
1	2.3s	697Hz	1209Hz	1	
2	5.3s	697Hz	1209Hz	1	
3	8.6s	697Hz	1209Hz	1	
4	9.11s	941Hz	1477Hz	#	
5	9.43s	697Hz	1209Hz	1	Faint, tone shifts to non DTMF at end
6	9.53s	941Hz	1633Hz	D	
7	9.91s	697Hz	1477Hz	3	
8	10.36s	770Hz	1209Hz	4	
9	10.77s	770Hz	1336Hz	5	
10	11.58s	697Hz	1633Hz	A	
11	12.41s	697Hz	1209Hz	1	After this 3-10 repeats but quieter



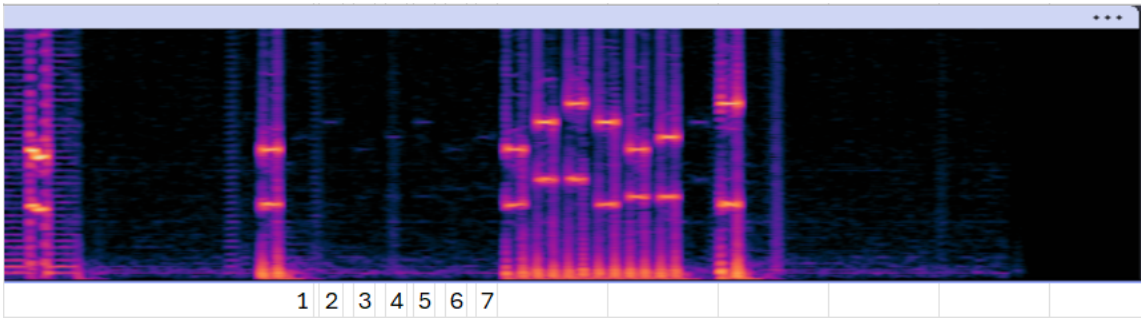
First Part Faint Frequency:
If combined we get: 1 1 *5678* 1#D345 # A 11#1D345 A

	Faint Frequencies Left Channel				
Position	Time Stamp	Low Hz	High Hz	DTMF	Notes
1	7.06s	770Hz	1336Hz	5	1-4 Faint appear between 2-3 on main
2	7.54s	770Hz	1477Hz	6	
3	7.93s	852Hz	1209Hz	7	
4	8.39s	852Hz	1336Hz	8	
5	9.43s	941Hz	1477Hz	#	Between 9-10 on main



Last Part Faint Frequency (Middle part has none):
1 1 *2345678* 1#1D345 # A

	Faint Frequencies Part 2				
Position	Time Stamp	Low Hz	High Hz	DTMF	Notes
1	29.03s	697Hz	1336Hz	2	Almost invisible but FFT reveals spikes at 697Hz and 1336Hz
2	29.43s	697Hz	1477Hz	3	
3	29.81s	770Hz	1209Hz	4	
4	30.29s	770Hz	1366Hz	5	
5	30.07s	770Hz	1477Hz	6	
6	30.95s	852Hz	1209Hz	7	
7	31.41s	852Hz	1336Hz	8	



DTMF as Key to Shift Cypher using difference in values: **12345678** and **1#D345#A**								
First Half	**Hex**	**Dec**	**Second Half**	**Hex**	**Dec**	**Difference (A-B)**	**Difference (B-A)**	**Difference (Absolute)**
1	31	49	1	31	49	0	0	0
2	32	50	#	23	35	15	-15	15
3	33	51	D	44	68	-17	17	17
4	34	52	3	33	51	1	-1	1
5	35	53	4	34	52	1	-1	1
6	36	54	5	35	53	1	-1	1
7	37	55	#	23	35	20	-20	20
8	38	56	A	41	65	-9	9	9

^Toying with the idea of using the difference of the 2 parts of the string as either a stand alone string or a Shift Cypher Key

2nd livestream jmksz o

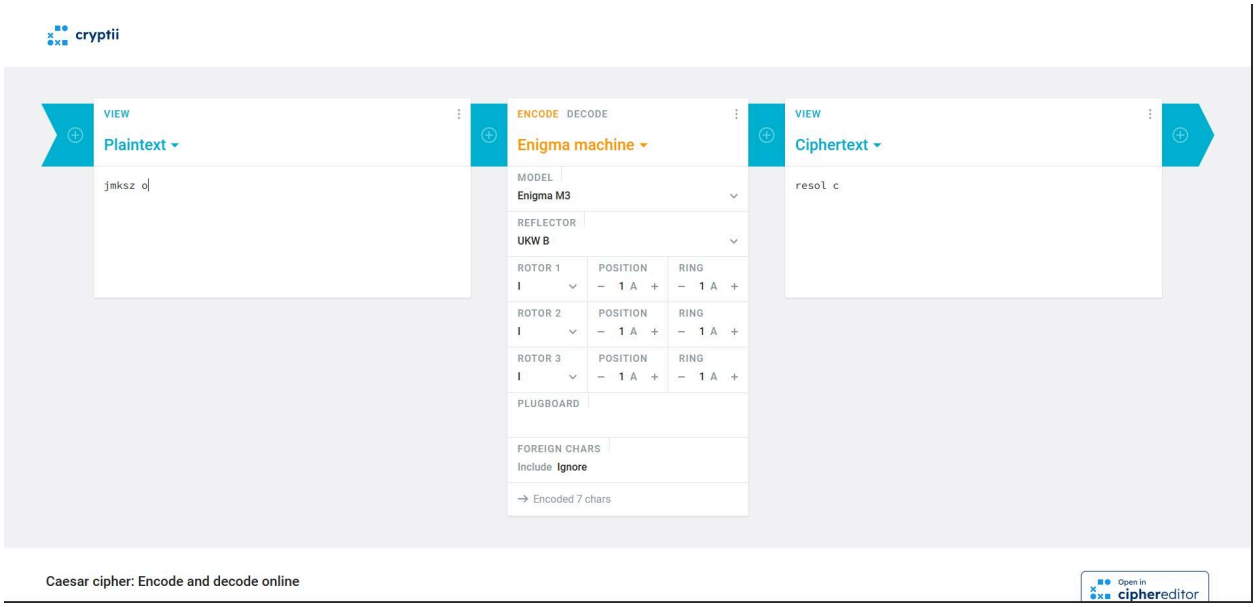
Link to stream: jmksz o

Livestream timestamps	
00:53	Music starts (“Aria Variata, BVW. 989 - Variation No. 1” by Mark Thomson - looping)
44:10	Audio glitch interrupts the music
49:48	Windows "ding" sound
3:03:40	Song abruptly ends
3:05:45	Spectrogram image of fruit snack bag, with "FILIAN IS LOST" written over it
3:06:22	Louder repeat of the fruitsnack image
3:06:46	Music continues
3:53:44	Music suddenly stops
6:27:14	Music suddenly resumes mid-note
6:27:30	Music pauses
6:27:45	Music once again resumes
07:17:28	Music abruptly ended once again
11:07:06	Stream ends (no audio playing during end)

Video Title: jmksz o. Plugging this text into the enigma machine cypher with the default key on cryptii (all 1s) translates to resol c, or closer backwards. It should be noted that enigma machine splits text into segments of five when encoding, so resolc would be encoded to resol c. [credits; **TeleportBread** for the solve and **gm_flatass** & **liquidwater2** for theory on discord]

Solution: jmksz o >> enigma machine >> resol c

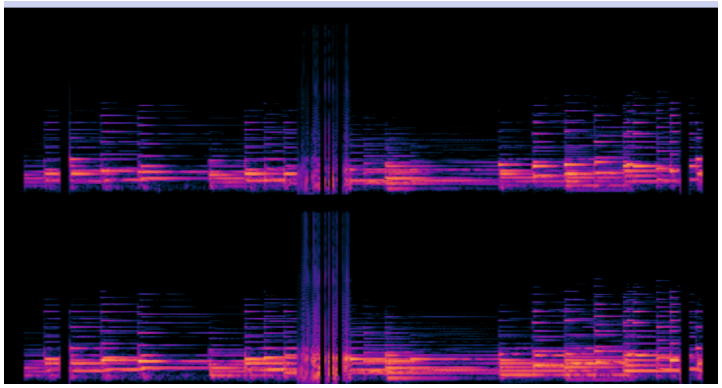
Description: The description is 114 slashes (\\\



(pictured is “jmksz o” solved as “resol c” on a ‘blank’ enigma machine)

Audio glitch aprox 44 m 10 s

https://youtube.com/clip/UgkxYYfTmx-tF8y0pHKfq3-RfhoOua9Y-7HP?si=xcoFMII4Ke0Z26Vt



These glitches appear to be natural and are presumed to mean nothing.

Spectrogram image originally found by finite emporium on discord:

FILIAN IS LOST

3rd Livestream 28'_'

Stream link: _____

Livestream was unlisted and was running for about 1h 45min before becoming public
(Somebody maybe has a more accurate time stamp I was a little late so i'm guessing)

Stream timestamps	
~1:45:00	Stream is made public all previous video is blank, audio is fully silent
As of 18:55:28	Stream is still silent with no video
As of 28:44:54	Still all silent and without video, confirmed with ffmpeg
32:27:58	Suite Bergamasque, L. 75: III. Clair de lune started playing
73:37:58 (~7 min shy of 72 hours public)	Stream abruptly ended in the middle of music playing and video was unlisted shortly afterwards

Video Name:28 underscores (_____) this is as of yet unsolved/unexplained.
Description: No Description

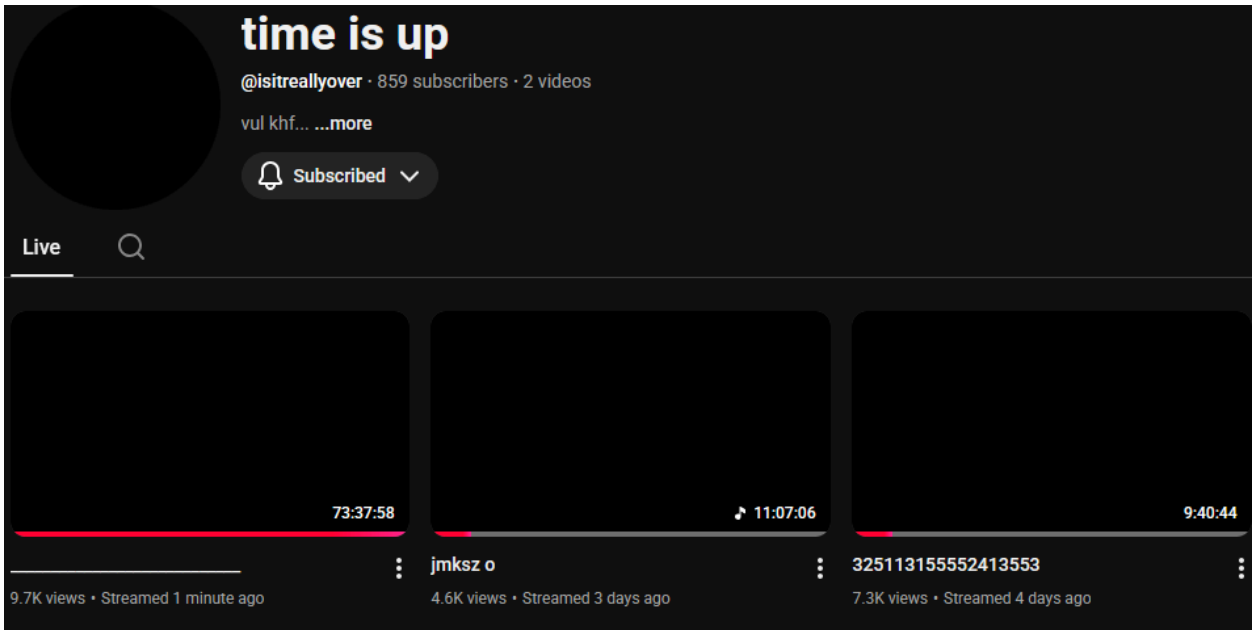
Additional Info:
The number 28 might be related to **BWV 28**
Gottlob! nun geht das Jahr zu Ende, BWV 28 Cantata by Johann Sebastian Bach
(Praise God! Now the year comes to an end)
Another name is - 'The Year is Ending'

This might relate to the channel "time is up" and "I thought I had more time"

The video is unarchived, so it is unlikely that the contents themselves are necessary for any ARG solutions.

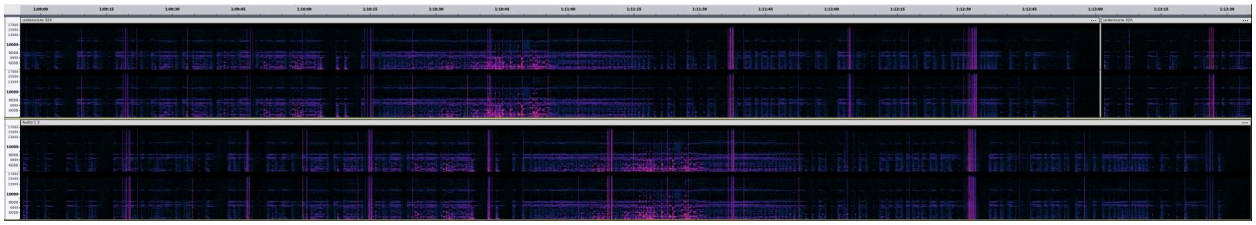
Original version is this recording:
Debussy - Clair de Lune [NO COPYRIGHT MUSIC]
(credits **Finite Emporium** on discord) *note this likely is not the original distributor/creator of this particular recording, an effort should be made to find it*

Stream abruptly ended and a quick check of the channel page showed the following:



Shortly after this was snipped, the video was delisted.

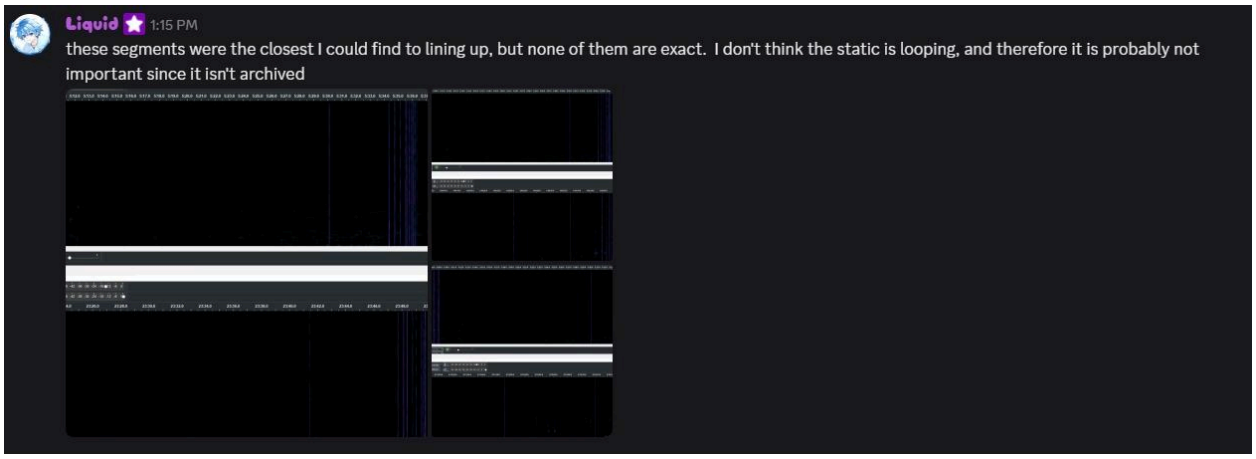
The stream of Clair De Lune contains audio distortion that sounds like clipping or stopping, it was theorized by some users that this may be some kind of encoding like binary or similar code into the audio to solve. User **Mateon1st** on discord investigated the distortions for alignment across loops of the music and detected clear inconsistencies between the glitching, unable to produce an alignment that suggests its a looping code intended to be discovered below is an attached screenshot of one of **Mateon1st**'s attempts proving the encoded audio theory highly implausible:

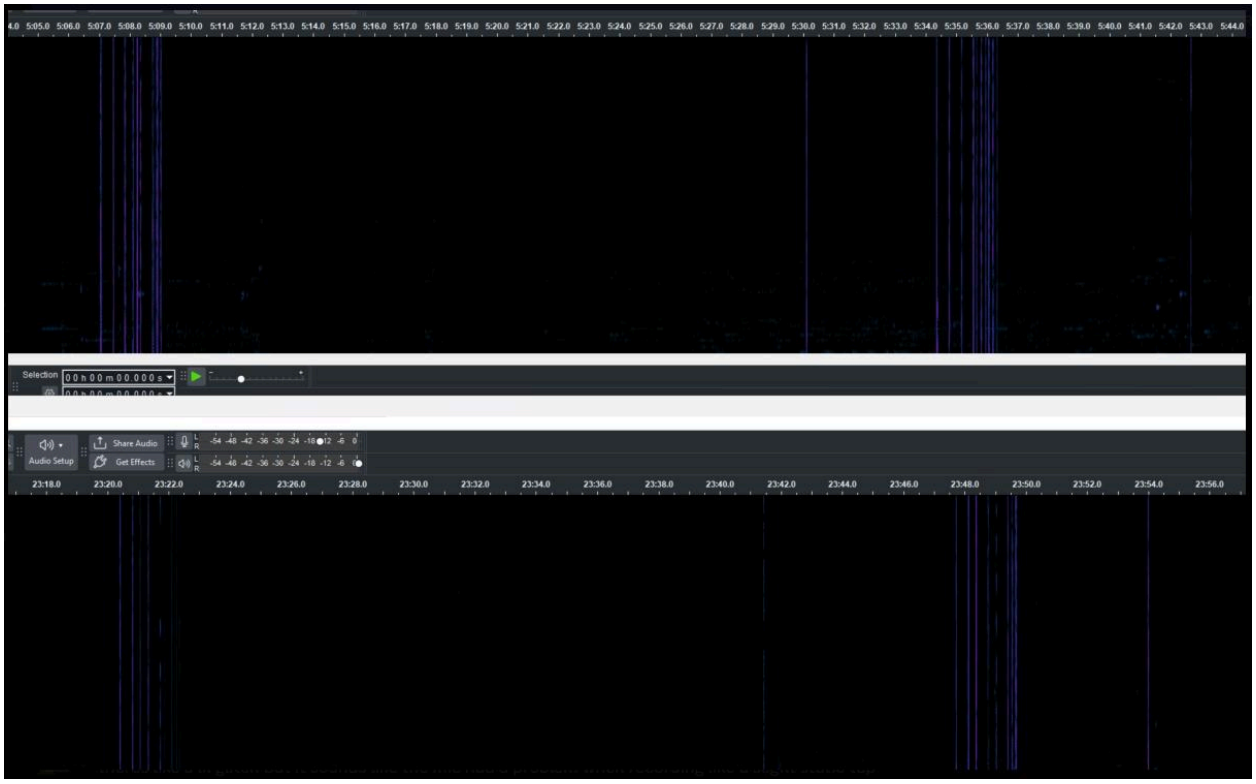


The main glitches are all exactly 1024 or sometimes 2048 samples long, this is the packet size of mp4a/AAC-LC audio that youtube is using for the livestream. All glitches appear at the same relative offset modulo 1024 from the start of stream (all glitches start/end at sample `42 % 1024`), which is decent evidence that this glitching originates in filian's audio/livestream setup, and is ~~likely some kind of corruption or packet loss~~. (see below)

The audio cuts to near silence on both channels during the glitches, sharply cutting off the audio waves, which causes the audible pops. This shows as a straight, featureless vertical bar in spectrograms

As a follow up and verification of the work done by Mateon1st, **Liquid** on discord investigated the glitches as well. After extensive work to determine if perhaps there was a longer duration loop of embedded audio across several repeats of Clair De Lune. By cross referencing several longer runs of audio/loops to determine if a pattern or alignment was possible, **Liquid** concluded that there is no larger pattern that signifies the glitches/audio were placed intentionally. Below are 2 screenshots of Liquid's work:





—----------

In case it's of importance the poem in both original French and translated english;
(French)
Clair de lune Votre âme est un paysage choisi Que vont charmant masques et bergamasques Jouant du luth et dansant et quasi Tristes sous leurs déguisements fantasques. Tout en chantant sur le mode mineur L'amour vainqueur et la vie opportune, Ils n'ont pas l'air de croire à leur bonheur Et leur chanson se mêle au clair de lune, Au calme clair de lune triste et beau, Qui fait rêver les oiseaux dans les arbres Et sangloter d'extase les jets d'eau, Les grands jets d'eau sveltes parmi les marbres.

(English)
Moonlight Your soul is a select landscape Where charming masqueraders and bergamaskers go Playing the lute and dancing and almost Sad beneath their fantastic disguises. All sing in a minor key Of victorious love and the opportune life, They do not seem to believe in their happiness And their song mingles with the moonlight, With the still moonlight, sad and beautiful, That sets the birds dreaming in the trees And the fountains sobbing in ecstasy, The tall slender fountains among marble statues.

Paul Verlaine, 1869
(as provided by **Blackrose** on discord first brought up by **Stardrop** on discord)
—----------

4th Livestream

Stream Link: https://www.youtube.com/watch?v=ybVqOeumc4M

Livestream timestamps	
00:18	Music starts
03:39-03:46	Single Dial Tone beep repeated in a morse-like pattern, but starting with illegal 6 dots . . . . . ⁻. . .. . ⁻. . ..
06:43	Sounds like the clicking of opening a safe, interrupted by videogamey "failure" sound (turned out to be blackfile-index.org sounds)
08:55	Dial Tone beeps (exact repeat)
09:30 09:50	Clicking sounds and "failure", single repeat each
14:11	Dial Tone beeps
19:27	Dial tone beeps
~33:00	Three more sections of clicks and “failures”
At 12:40 pacific description changed for about 10 seconds saying the following in the middle of the slashes:	Now that you have everything, keep looking 12:45-50~	Title was changed to “.” aka a single period
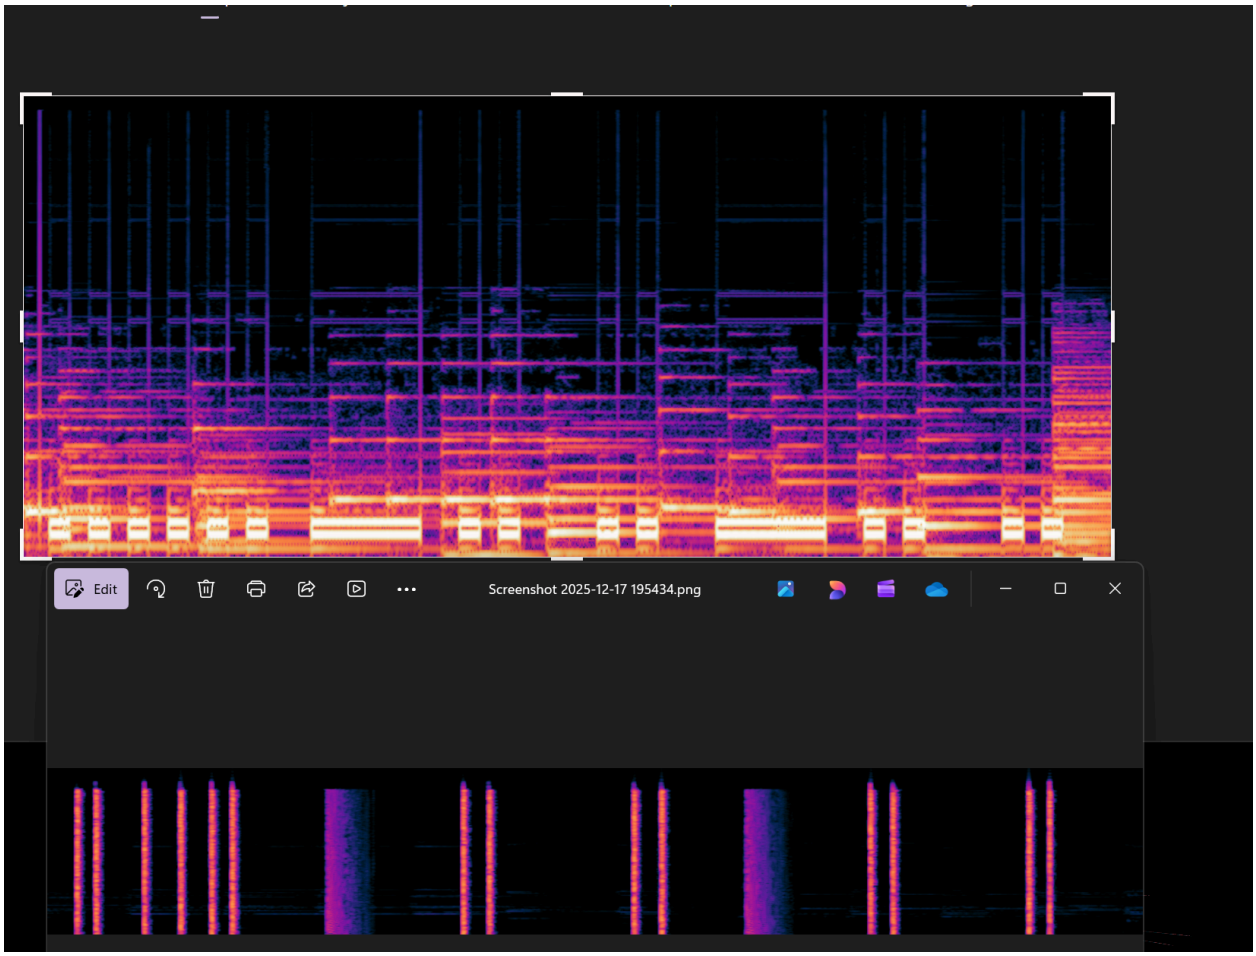
2:02 AM pst	The following unlisted youtube link was posted in the chat by the channel account. Stream ended about 2 seconds later https://www.youtube.com/watch?v=qJ98vSrX2uU

Video Name:28 underscores, same as the previous stream ”_____”, changed to “.” toward the end. this is as of yet unsolved/unexplained.

Description: 4999 backslashes (not typing this here for space reasons) Eventually changed temporarily to include Now that you have everything, keep looking in the middle.

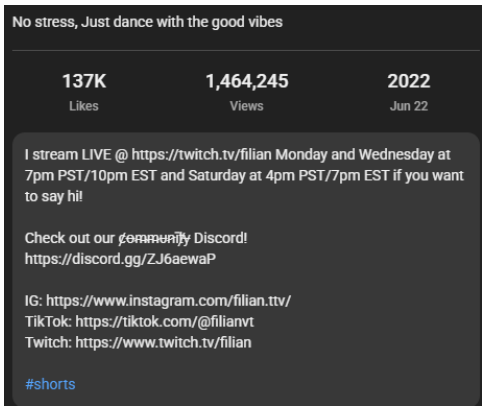
Additional Info:
This stream had static frames rather than a pitch black screen. In this way it was different than the previous three. More info on the static frames tab.

Morse code sounds and the clicking sounds line up. Credit: Liquid (@liquidwater2 on discord)



At 5:01 AM, a discord server link with corrupted text was found in the description of a short posted on 6/22/22, and was the solution to this livestream.
(Credit: liquidwater2 for discovering the code was 6 22 22 and referencing a date/time, antuber_46672 for finding the short posted on that date, and Dababe31 for finding the discord invite link)

Short Description:



Discord server link: https://discord.gg/ZJ6aewaP

Music: Sonata in G Minor, Op50 No.3 - Didone abbandonata (Clementi), original per Discord user Skragger: https://www.youtube.com/watch?v=zxY0HHos_9U
https://en.wikipedia.org/wiki/Didone_abbandonata_(Clementi)

In the last twitch livestream (the one that includes the start of the ARG at the end), Filian dies at exactly 6:22:22.

"Didone abbandonata" translates to "Dido Abandoned" in English. It refers to the tragic story of Dido, the queen of Carthage, who is abandoned by her lover, the Trojan hero Aeneas, as he departs to fulfill his destiny of founding Rome. The title is derived from the myth recounted in Virgil's *Aeneid*, where Dido, heartbroken by Aeneas' departure, ultimately takes her own life by throwing herself onto a funeral pyre.

At about 2:02 AM PST, an unlisted video was linked in the 4th Livestream chat:
https://www.youtube.com/watch?v=qJ98vSrX2uU
Title: / /
Description: (no description)
This video was removed shortly after and is now unavailable as it was potentially made with errors, 6 2 2 instead of 6 22 22

At about 2:15 AM PST, another video was posted on the ARG channel's Posts tab (https://www.youtube.com/@isitreallyover/posts):
https://www.youtube.com/watch?v=z0DeGdzKZGg
Title: / /
Description:
//

static frames

Makedonski:
Processed 18000 frames (first 10 min). Almost all frames are unique, which means that the noise is generated procedurally(TODO: check more frames, maybe i will found larger loop). Also we have some identical frames. Interestingly, they always come in pairs of 2 and there are about 1000 frames between pairs(each pair is different from another):

```
frame_00000151.png frame_00000150.png
frame_00001189.png frame_00001188.png
frame_00002215.png frame_00002214.png
frame_00003206.png frame_00003205.png
frame_00004312.png frame_00004311.png
frame_00005338.png frame_00005337.png
frame_00006491.png frame_00006490.png
frame_00007504.png frame_00007503.png
frame_00008516.png frame_00008515.png
frame_00009880.png frame_00009879.png
frame_00010850.png frame_00010849.png
frame_00011923.png frame_00011922.png
frame_00013104.png frame_00013103.png
frame_00014286.png frame_00014285.png
frame_00015386.png frame_00015385.png
frame_00016472.png frame_00016471.png
frame_00017478.png frame_00017477.png
Completed identical frames: 34
```

I checked the identical frames, found nothing but noise.

--
Looking at the frames, frame by frame, with gamma enhancement, it looks like it's just a loop of noise roughly 5 frames in length (but not exactly, sometimes it skips). The randomness is introduced due to compression artifacts and the low brightness of the noise pattern. You can see more of what the original pattern looks like by extracting the key frames only
–

Makedonski:
I don't know exactly how compression works on YouTube, so I can't really comment on the statement above.
I can only say that a repeating pattern does seem to be present, but only approximately.

I'll simply provide a list of facts after studying a one-hour segment of the stream throughout the entire day:

Most of the following facts were derived from the video keyframes (1,600 frames), not from the entire segment (90,000 frames). The facts that were verified on the full segment are marked with !!.

1. Most frames have a color palette ranging from (0, 0, 0) to (11, 11, 11).
2. !! The color (7, 7, 7) did not appear in a single frame.
3. In about one third of the frames, the color (12, 12, 12) appears.
4. !! Very rarely (< 1%), frames contain the colors (13, 13, 13) and (15, 15, 15). The color (14, 14, 14) did not appear even once, but this may be a coincidence due to an insufficiently large sample size for such a rare color (color 15 appeared only 3 times in 90000 frames).
5. If you take a mask for each color (a mask for color x means that all pixels equal to color x are set to 255, and all others to 0), then all masks are unique, which is quite surprising even considering YouTube compression.

What was checked:
1. All keyframe masks
2. All keyframes with the custom gradient maximized
3. The average image for each mask
4. A bitwise OR across each mask (in case parts of the image are hidden in different frames)

Summary: The only truly interesting fact is the absence of the color (7, 7, 7), which once again points us toward *STICK SEVEN*.

NOT fun fact: Due to the noise, it is almost impossible to check something automatically. Therefore, all 20000 masks had to be checked by hand (with preprocessing)

If you have any other ideas on what could be done, feel free to message me in dm or just ping me.
I can also send all the code if you want to verify or test something yourself.

Discord Servers

See this tab for how the discord server was found: The Filian ARG Document

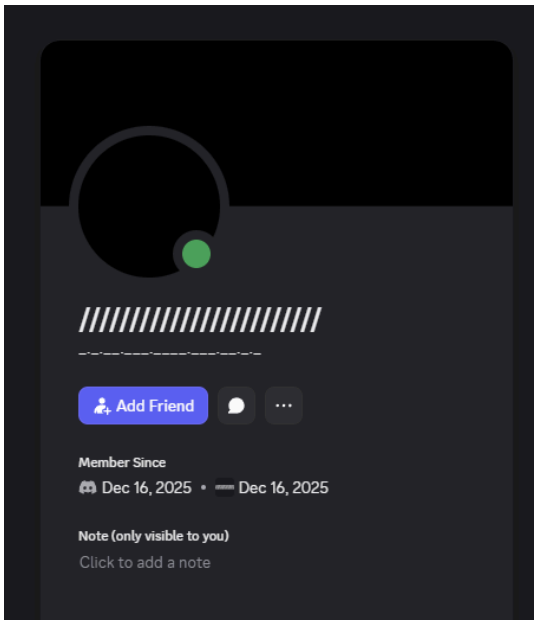
The original invite to the server has expired.
Server name: //////////////////////// (24 slashes)
Created by user: _._._.__.___._____.___.__._._
Note: no permissions to post in the only channel, though permissions previously allowed for events which caused experimentation/trolling.

Update: 12:20 UTC Dec 23, 2025. **Makedonski** found confirmation that the numbers at the end of the owner's username were automatically added by discord. Source

> **If your new account is not verified, your username will be given a random 5 digits to the end of your username after 7 days from account creation.**

Additional important information from discord username page:
1. Usernames **cannot use 2 consecutive period characters (.)**
2. Usernames **cannot use any other special characters besides underscore (_) and period (.)**

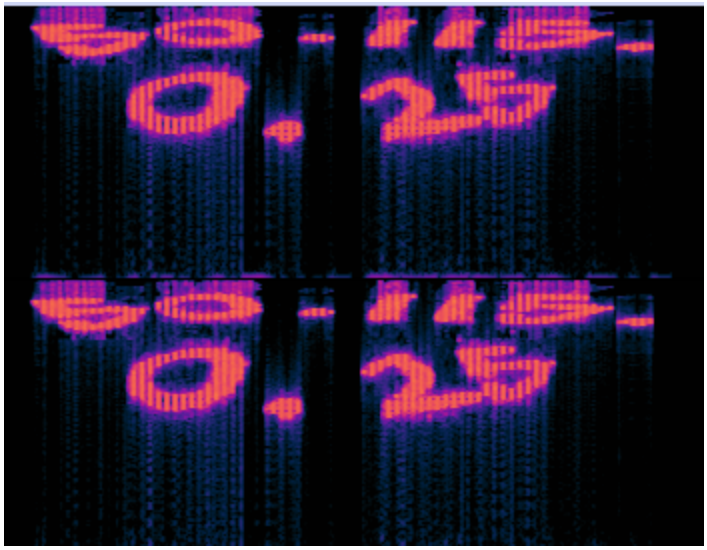
Pythonhare suggested that the dots are actually meant to be slashes:
_/_/__/___/____/___/__/_/_



Another idea is Gaussian; supposing so, `_._._.__.___.____.___.__._._` could be a normal distribution to ±4 sigma: `μ-4σ.μ-3σ.μ-2σ.μ-σ.μ.μ+σ.μ+2σ.μ+3σ.μ+4σ` but there's not really something to do with it.

If you grab the discord server owner, and brighten it you seem to get the exact same picture as the time is up channel icon with the hexcode for 'I thought I had more time'.

Voice channels were made available for a short time with names ".." ".." ". ." ". . ." and the last one allowed some users to play a soundboard. The soundboard in the discord server had an audio file which showed the IP address for the Minecraft server as an image on the spectrogram:



This spectrogram with the IP was found at 10:54pm PST on Dec. 19th, 2025 and a Minecraft server with that IP was connected to a few minutes later by 11:01pm PST.

Snackers HQ

Moderator Savaeris established the ARG channel on 12/8/2025 at 8:08 pm PST a short time after the end of the Minecraft Marathon.

At 6:01 pm PST on 12/20/2025, moderator Achievos posted in the announcements channel a plea for help searching the Minecraft server for ‘it’ and boosted the ARG channel.

At 3:32 pm PST on 12/24/2025, Snackbot posted in Filian’s announcements discord channel about the ARG and this was noted a few minutes later by moderator Dragun in the ARG channel. *At this time we do not know if this means we are done or if there is more to the ARG, but early on 12/25/2025 the Minecraft server description changed - suggesting there is more.*

Minecraft Server

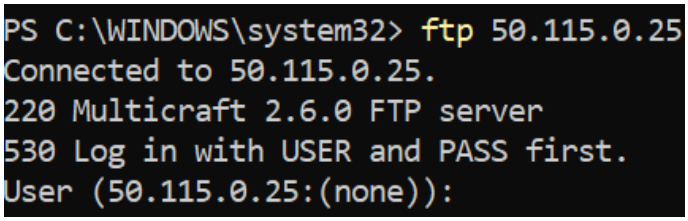
Minecraft Server

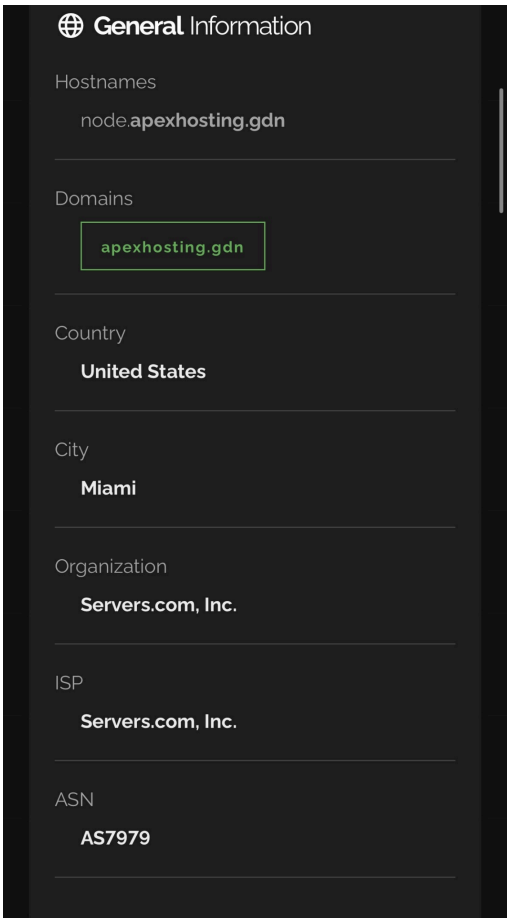
IP: 50.115.0.25

Important server info

Gamemode: Hardcore - if a player dies, they can only spectate afterwards
Title: Originally “find it”, temporarily changed to “If only you knew how much more is out there” after the second structure was found, then almost instantly changed to “find. it.”.
Version: Java 1.21.11
Seed: “711026799995424918” *Interestingly, this fits into the . and _ sequence as 7.1.10.267.9999.542.49.1.8*

Server is hosted on apexhosting with a multicraft console (GeoScape on Discord):





Spawn is not at 0, 0 but instead at 1123, 99, -1853
Command Block Coords:
"1123, 90, -1853
1123, 89, -1853"

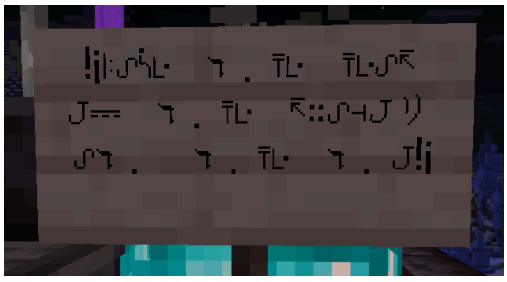
Timeline:

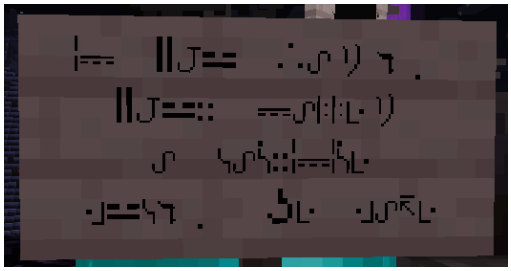
- The ender dragon was defeated at approximately 2:36am PST Dec. 20, 2025.

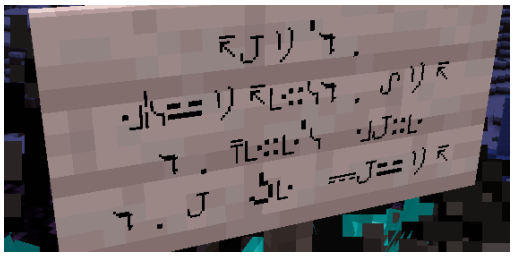
- There was a sign placed in the graveyard which said to look in an ice area to get back the dead players. This was later confirmed to be a clue from the GM.

- Liquid (liquidwater2 on discord) found a structure resembling an altar at approximately 7:30 pm PST Dec 20, 2025 and signs surrounding it were translated from the galactic alphabet by corrizer and Liquid.

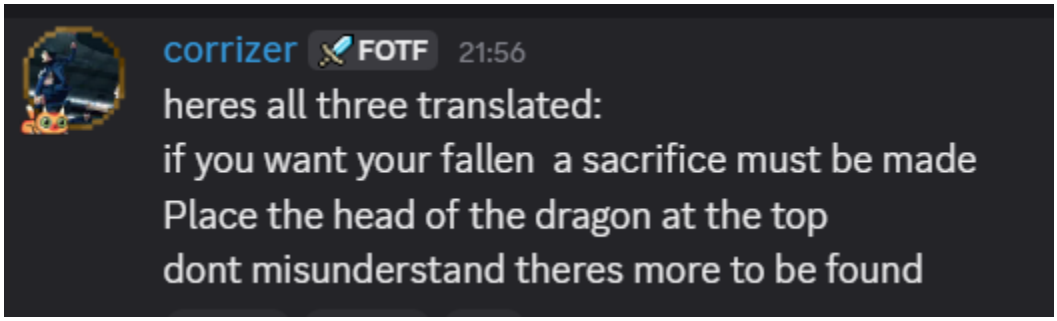
Photos of the altar and signs:
Location is -401, 101, -3075 roughly

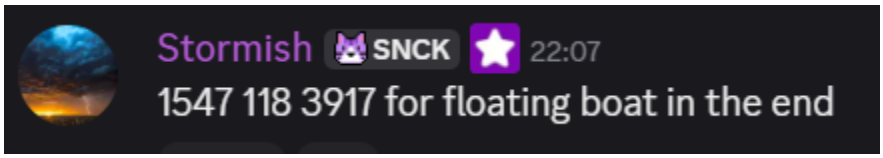






Solution:
Signs are originally in the galactic alphabet (enchanting table alphabet), translated they say the following:





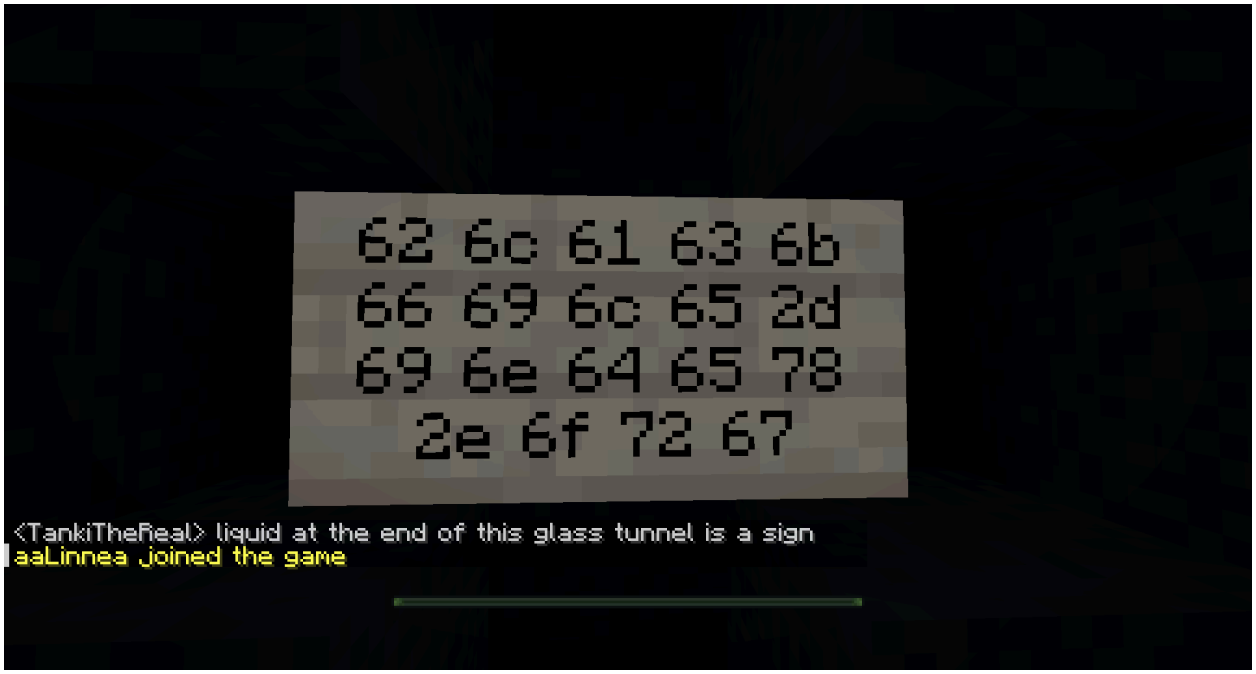
- Ratwagonz found an End ship and got a dragon head shortly after 8pm PST Dec 20, 2025.
- The resurrection event was triggered at approximately 8:30pm PST Dec 20, 2025.
- Spectators that did not get to the ground fell while others suffocated inside terrain. The resurrection event pulsed for a time, allowing repeated respawns.
- As of 8:17 UTC permadeath is back on

Filian Temple

- About 11:16pm PST on 12/23/2025, Stardrop found a custom-made area in the End resembling a temple near **1607, 35, 439** and an expedition was quickly launched to investigate. After investigating the area command blocks were found, confirming that this was not a player made structure.

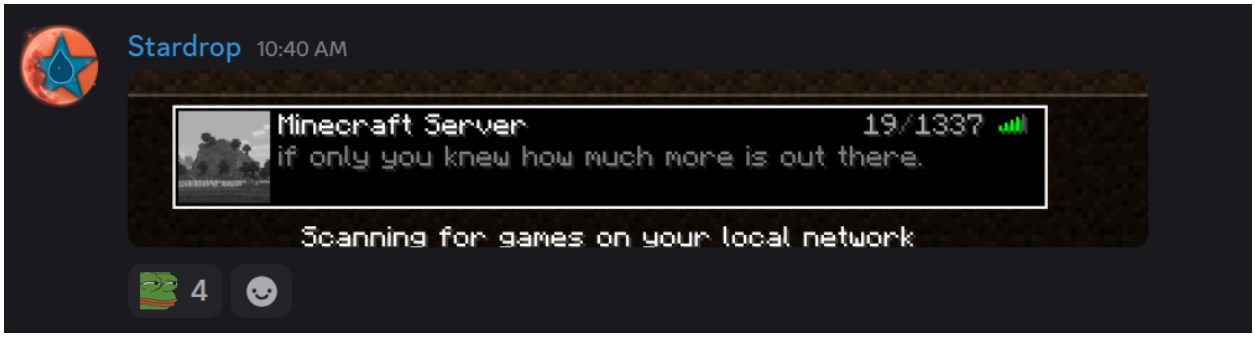
Photos of the temple structure:

- A sign was far back in the temple at **1664, 42, 439** was found a few minutes after the initial discovery, which when decoded linked to https://www.blackfile-index.org/ [hex -> ascii yields: blackfile-index.org]



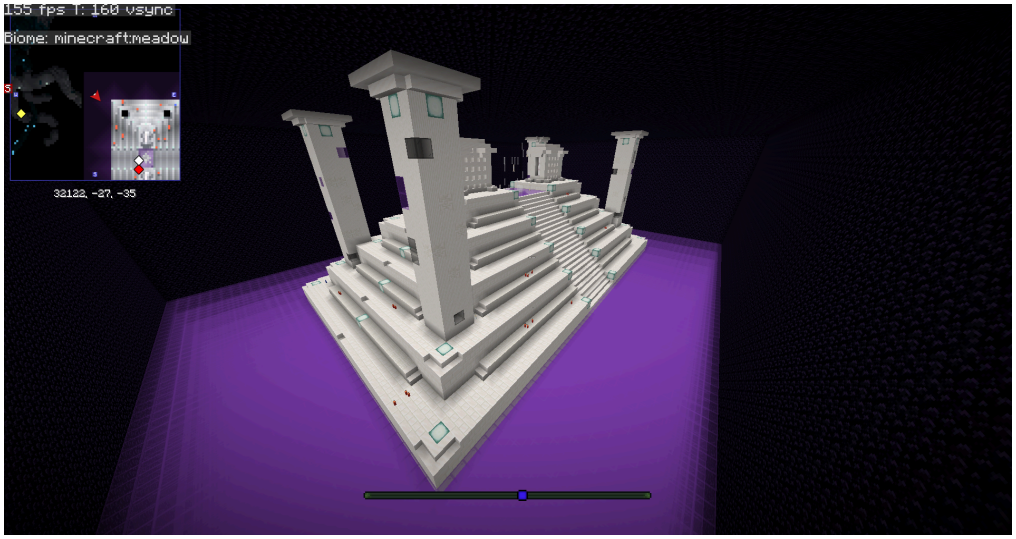
- The website audio for typing and incorrect answers is the same as the “typewriter” sounds heard in the fourth stream, which gave the pattern 6 22 22. (Credit: liquidwater2 on discord)

- At 11:40 PM PST 12/24/2025 someone saw a new message after the server restart: “if only you knew how much more is out there.”



- The server description was quickly changed again to “find. it.”, adding periods to the original description

- The following structure was found by Liquid on 3/17/2026 using the konami code riddle. Additional details under that tab.



- The structure was raided by waves of difficult mobs (ex. Wardens, Withers, Ender Dragon) at or shortly before 3:03 PM PST on 2026/03/25
    - The golem precautions served their purpose and at the end were forcefully destroyed by the GM (possibly to focus on counting the cats)
    - Per Dabebe31, it was something like 1- Wardens start spawning 2- Ravagers start spawning 3- Withers start spawning 4- A dragon spawns 5- Witches, vexes and the cats start spawning 6- Last wave of wardens spawns and after we kill them and the drake the sound appears
    - 15+ cats were spawned by the GM during the event, reports are 15 cats were always alive during and by end of event despite some being killed during fight
    - 1 cow was spawned by the GM
    - Uncertain if efforts by Tanki to match blocks into the glass inserts triggered this event, the nearly 8 full days from activating corner text did, or the livestream setup by Pizzabash, but GM was definitely present and initiated the event
    - VOD https://www.twitch.tv/videos/2731635389?t=1h44m52s
        - Tanki breaks a block in the upper right (black glass) just before this timestamp and a warden spawns left of the structure 1-2 seconds later

Clean Temple Download

https://drive.google.com/file/d/1MAlw_vjH7qNvgoDRntkGlQs06DIf13dr/view?usp=sharing

The link is too a drive with a world file of the temple untouched before discovery

To use

Computer Steps

1. **Open the drive link**
2. **Download the file**
3. **Unzip the file**

Minecraft Steps

1. **Create a new world in SP**
2. **Set to creative and make sure commands are ON**
3. **Use the MC seed (7110267999995424918)**

Computer Steps 2.0

1. **Locate your Minecraft folder the default path is usually C:\Users\(whatever your username is)\AppData\Roaming\.minecraft**
2. **Go to saves**
3. **Open the save of the world you just created**
4. **Drag and drop the unzipped folders and files into this folder**

Minecraft Steps 2.0

1. **Relaunch Minecraft**
2. **Open the single player save you just created**
3. **Press T or your chat key**
4. **Type /tp @s 32137 -27 18**
5. **Schizo away Snackers**

World download courtesy of aezukla on Discord give them many headpats if seen

Hypotheses

1. Riddle describes a singular Earth reference point as the cross
    a. `If I’m lost, the backup coordinates can be found on Earth near where east meets west: An ancient sea bridge, an island between B and C, bodies both. I have a yankee sixth sense about it. Two ivory towns. Carry the cross into the Mine, just the whole numbers, sixty three times raise the parallel, just twice the long.`
2. Riddle describes multiple Earth reference points and a resulting cross
    a. `If I’m lost, the backup coordinates can be found on Earth near where east meets west:`
    b. `An ancient sea bridge, an island between B and C, bodies both.`
    c. `I have a yankee sixth sense about it.`
    d. `Two ivory towns.`
    e. `Carry the cross into the Mine, just the whole numbers, sixty three times raise the parallel, just twice the long.`

The Search

Current searches are Earth coordinates that would be converted to Minecraft coordinates, or less likely, Wplace coordinates.

Places on Earth and why they fit in order of most promising to least:

- An island between 36°N to 45°S, and 179.21°E/W to 179.37°E/W

    - Post finding temple within X=32116 to 32176, Y= -58 to -22, Z= -45 to 36
    - X= Longitude^2, Y= ?, Z= Latitude (no change; 60*3 → 180)
    - Tuvalu islands Niulakita or Niuoku Islet as candidates
    - Fiji islands between and including Vanua Levu, south to Gau Island, southeast to Matuku Island, northeast to Tavu-Na-Sici, north to Cicia Island, north to Nanuku Island (and small islands off its coast), Kaibu Island, north to Qelelevu, northwest to Thikombia Island (and back to Vanua Levu)
    - B= Bligh Water ? off Vanua Levu, but no known C=
    - Two Ivory Towns = To IT *or* something actually ivory colored due to coral
- Diomede Islands: 65°47′N 169°01′W
    - B = Bering Sea, C = Chukchi Sea
    - One island is East (Russia), other is West (USA)
    - Along hypothesized Ancient Sea Bridge (Bering Strait crossing - Wikipedia)
    - Little Diomede island is somewhat famous for ivory carving (Big Diomede Island population was evicted in 1950s)
- St Lawrence island: 63.3261° N, 170.0184° W
    - B = Bering Sea, C = Chukchi Sea
    - Near East/West dividing line (International Date Line)
    - Sixth largest USA island (yankee sixth sense)
- Istanbul, Turkey: 41° N, 29° E
    - Historically East meets West
    - Bridge between two seas since ancient times (both land and water)
    - Two castles built with light colored stone guarded the Dardanelles strait at: 40° N, 26° E Kilitbahir Castle - Wikipedia and https://en.wikipedia.org/wiki/Çimenlik_Castle
- New Guinea: 7° S, 145° E
    - B = Bismarck Sea, C = Coral Sea
    - Torres Strait between New Guinea and Australia is shallow and was a bridge
    - Ivori people have three towns, two with coordinates: 7° S, 145° E
    - New Guinea is divided into East / West by Indonesia / Papua New Guinea border
    - Significant mining, very large Ok Tedi Mine at 5° S, 141° E
- Point Barrow, Alaska: 71°23'20" N, 157°28'45" W
    - B = Beaufort Sea, C = Chukchi Sea (N most US point, small islands in area)
    - Near infamous Will Rogers & Wiley Post crash while surveying an air mail route from the West Coast to Russia
    - United States land (yankee)
- Iceland: 64.9631° N, 19.0208° W
    - B = Britain, C = Canada
- Area near Sheffield Green: 51N, 0E
- UK island of Lundy: 51° 10′ 48″ N, 4° 40′ 12″ W

    - Post finding temple at 32137, -27, 18 (see The Filian ARG Document)
    - B = Bristol Channel, C = Celtic Sea (see https://upload.wikimedia.org/wikipedia/commons/c/c1/Celtic_Sea_and_Bay_of_Biscay_bathymetric_map-en.svg)
    - 4°W is near 0° (east meets west)
    - X=Latitude and Z=Longitude here, requires 63 * 10 * X
- Unnamed Shamkir island: 40 46

List of possible locations fitting the puzzle :

(Green = fits the entire puzzle)

- Diomede Islands: 65°47′N 169°01′W
    - If the riddle is 'raise' = * and lat/lon are x/z: -338, 4095
    - If the riddle is 'raise' = + and lat/lon are x/z: -507, 4160
- St Lawrence island: 63.3261° N, 170.0184° W
    - If the riddle is 'raise' = * and lat/lon are x/z: -340, 3969
    - If the riddle is 'raise' = + and lat/lon are x/z: -510, 4032
- Istanbul, Turkey: 41° N, 29° E
    - If the riddle is 'raise' = * and lat/lon are x/z: 58, 2583
    - If the riddle is 'raise' = + and lat/lon are x/z: 87, 2624
- Point Barrow, Alaska: 71°23'20" N, 157°28'45" W
    - If the riddle is 'raise' = * and lat/lon are x/z: 314, 4473
    - If the riddle is 'raise' = + and lat/lon are x/z: 471, 4544
- Iceland: 64.9631° N, 19.0208° W
- Area near Sheffield Green: 51N, 0E
- Unnamed Shamkir island: 40 46

Checked Coordinates

List of tried coordinates so far (not up to date)
note: Minecraft has flipped coordinates from expected → x=longitude, z=latitude
-z is north and +z is south
real conversion is 1 degree = ~111 km or ~111,111 blocks hopefully not this

Overworld (x/[y]/z)

Coords calculation

Fog_runner: made progress on reverse engineering the **temple location**. If I take the exact coordinates someone wrote in the doc (1617 / 30 / 439), translate all of that into binary (11001010001 / 11110 / 110110111), then rewrite that into morse (..--.-.---. /....- /..-..-... ; 1 as ‘’.”, 0 as ‘’-”) then the second and third parts can be transcribed into SET (.../ ./ -) / FREE (..-./ .-./ ./ .), but the first part doesn't work like that. Maybe the "correct" coordinates for X are something different

Maybe we need combinations of 3 words that are somehow relevant to the arg (like (?) / SET / FREE). Then the word needs to be translated into morse, then into binary, then into decimal for actual coordinates for the minecraft server.

Altar coords reverse engineering

Then I attempted to do the same with the altar. Coords - (-401 / 101 / -3075). In binary - (110010001 / 1100101 / 110000000011). In morse, without the minuses - (..--.---. / ..--.-. / ..--------..). Tried to keep the minus in the sequence, but X only translates into a coherent word without it - MUST. Y and Z don’t yield anything, possible that they are not exactly “correct”.

So if I try Y = 102 then I get the following words - MEAN, GATE, MUTE, MIME. If I try Y = 103 it results in MUM or MUTT which don’t work at all. The word GATE at least is relevant to death and resurrection. Y = 100 results in MINE, GENE, MERE, MID. Y = 99 results in GUT.

If then I try different X values, X = -397 (with a minus) yields PEAK, ANIMA (the soul). For clarity: - 397 = - 110001101 = - ..---..-. = ANIMA or PEAK (as coherent somewhat relevant words, ANIMA especially).

Result - (ANIMA / GATE / ?).

This is proof of concept, I didn’t even expect it would work at all. Could be useful.

Take 3 or 2 words that seem relevant together and apply the logic above (word to morse to binary to decimal) and look where it leads. Try synonyms too (like soul and anima).

Word-to-coord

Implementation of word-to-coord method. First two coords were the results of reverse engineering (for in depth logic look at “coords calculation” section), others are new .

Coords do not tell whether it’s overworld, nether or the end. The order is X / Y / Z.

If you want to do it yourself, a quick way to do it is to have two tabs opened (https://www.dcode.fr/morse-code ; https://www.dcode.fr/binary-code).

Important. If word-to-binary result starts with “-” then I treat it as a minus to the decimal result (because first zero doesn’t translate into anything when you do binary-to-decimal). Only then can we get results like ANIMA and ABSENT which give negative coords close to the actual altar of resurrection.
As of yet I don’t know how to treat words like MY (-- -.--). Is it just (-100) which in decimal is (-4)? The number of minuses is odd so it would make sense. But if the number of minuses is even do they cancel out in the context of morse-to-decimal? Left both variants just in case.

OW - overworld
N - nether
E - the end

Words	Morse	Binary	Decimal	Result
Based on reverse engineering (proof of concept):				
? / SET / FREE	(?) / ....- / ..-..-...	(?) / 11110 / 110110111	(?) / 30 / 439 (actual coords were 1617 / 30 / 439)	E - Filian temple location in The End
ANIMA / GATE / (ABSENT?)	-..---..-. / ..--... / - ..-------.-.	- 110001101 / 1100111 / - 110000000101	-397 / 103 / - 3077 (actual coord were -401 / 101 / -3075)	OW - Altar of resurrection
Ideas for coords based on the examples gathered:				
LITTLE/ . / DIOMEDE	.-.. .. - - .-.. ./ . / -.. .. --- -- . -.. .	1011110010111 / 1 / - 1111000001011 1	6039 / 1 / - 15383	OW - nothing of interest - checked by zankjeff N - unknown E - unknown

THE / _ / TRUTH	- ..... / ..--.- / - .-. ..- -	- 11111 / 110010 / - 10111001111	- 31 / 50 / - 1487	OW - nothing of interest (mineshaft and a trial chamber) - checked by zankjeff N - unknown E - unknown
KEEP / . / GOING	-.- . . .--. / . / --. --- .. -. --.	- 10111001 / 1 / - - 10001101001	- 185 / 1 / 1129 (or - 1129)	OW (both negative and positive variant of "Z") - nothing of interest (normal spawns) - checked by zankjeff N - unknown E - unknown
TIME / IS / UP	- .. -- . / .. … / ..- .--.	- 11001 / 11111 / 1101001	- 25 / 31 / 105	
Possible but insane variants:				
IT / NOT / FOUND	.. - / -. --- - / ..-. --- ..- -. -..	110 / - 10000 / 1101000110010 11	6 / - 16 / 26827	
BLACK / FILE / INDEX	-... .-.. .- -.-. -.- / ..-. .. .-.. . / .. -. -.. . -..-	- 1111011100101 010 / 11011110111/ 110101110110	- 63274 / 1783 / 3446	
FILIAN / IS / LOST	..-. .. .-.. .. .- -. / .. … /.-.. --- ... -	1101111011111 001 / 11111 / 10110001110	57081 / 31 / 1422	

Meme variants:				
SAY / MY / NAME	... .- -.-- / -- -.-- / -. .- -- .	111100100 / - - - 100 / - 110001	484 / 4 (or -4) / -49	

We can apply this method in reverse if we have the coordinates (like in the reverse engineering part).

Example for the Diomede Islands coordinates (65°47′N 169°01′W):

If I take "just the whole numbers" (65 and 169), "63 times raise the parallel" (65 becomes 128), "just twice the long" (add 2 to the longitude - 169 becomes 171) I get 128 and 171. Tried to apply my method of turning decimal numbers into words, and the only fully coherent word I got out of these two is "SEAWARD". I got it by combining them (128171), turning the result into binary (11111010010101011), then into morse (.....-.--.-.-.-..). The only way to split this sequence fully into a single word is SEAWARD (... . .- .-- .- .-. -..). Tried this method to a bunch of other possible combinations (got SINGKEK once), but got nothing else of notice. Tried SEAWARD as a password for CITF_MEMO.TIF but nothing (unless capitalisation matters)

Tried to apply this method to numbers separately, but it got me nowhere. 128 171 | 10000000 10101011 | .------- .-.-.-.. | which can be transformed into “RCE”; “1ORCE” and other things, none of which worked for CITF_MEMO.TIF, but I didn’t always check different capitalisations.

Stronghold coords

Coords are accurate to Stronghold portal room spawner block (nether roof ports y = 128)
All end portals should now be activated, none appeared activated without intrusion

"find it" Theories

wSillyProotSoda and Veter992:
Thinking that “it” could be a item in suspicious sand or gravel, going to recheck trial chambers for them.

Makedonski:
I have a schizo theory. I rechecked the recording with minecraft steps, and with a big gain, it can be seen that this is a poorly trimmed cycle of 6 slow, 11 normal and 10 fast steps. I thought it was logical to convert it to time (the slower the step, the longer the time) like 6:11:10. I decided to check the VODS, and found that in the first stream, perfect at this timing, the neuro disappears from the server https://youtu.be/RksF7wbZgfA?t=22270
https://www.twitch.tv/videos/2636167728?t=6h13m3s

Summary:"find it" = "find neuro"
How do we find neuro? solve the neuro arg

aaLinnea:
Time.
Time has been an overarching theme since the beginning, finding timestamps, finding dates, filian “running out of time” “time is up” “thought I had more time”. What have we lost? What is lost? Time. What are we searching for? … Maybe a timestamp. Maybe the timestamp of a debut.

Apton_ika:
In older clips she played the account ‘FilianIsLost’ (as in the ARG).
https://minecraftuuid.com/player/944da1d5-718f-4527-b37a-b454d550b217

In the actual HC Minecraft run she played on ‘FilianIsCringe’
https://minecraftuuid.com/player/70916122-8e54-4f4b-a800-6042935e650c

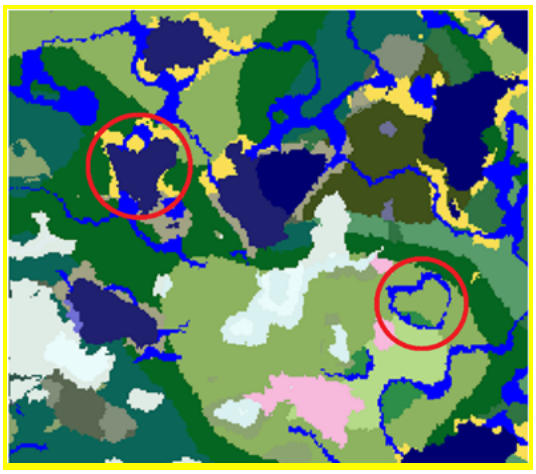
Fog_runner:
Possible relevant info from “diamond city lights” dance short, that had the link to arg discord server.

Based on the lyrics I have a couple of ideas.

1. «Data behind my heart's encryption key (Can you see?)

Listen and you might hear a melody»

Either the number of heartbeats (49) will be relevant soon, or it’s talking about the “heart” shape we should be looking for. The map people posted in “Minecraft server” has at least 2 candidates.



2. «When gray skies take the colors away (Far away) I'll paint a rainbow lasting for days and days», «Rainbow-colored skies invite us to take a ride», «A shimmering light that will guide you through the night». «In the night there's no need to hide».

Maybe clues are set to appear at night cycle or they are more obvious at night. Gray sky areas could be more relevant to the arg than others. Gray skies are common in winter, and the resurrection altar was found in the winter biome surrounded by flames that are easier to see at night. Maybe this clue is now exhausted.

3. «Let's go to the place», «Diamond city lights illuminate what's inside», «Decoding these emotions, you're the ocean I wanna dive into tonight».

This combined with point 1 suggests that there might be something beneath a heart-shaped body of water. Or, if heart shape is irrelevant, beneath any big body of water that could pass as an ocean by Filian's logic.

If I unleash my schizo interpreter, then there might even be music of sorts somewhere deep in the water to signify a correct place (a hidden jukebox maybe?). But based on the clues we had previously I wouldn't rely on this.

Cyrus:
If you use chappe code on the server separated into digits with the username _._.__.___.____.___.__._._ then you get:
décès graduer ? craindre que folio
which translates to:
death graduation ? fear that folio

This is likely in reference to the file on blackfile index meaning "it" will likely be a password to CITF_MEMO.TIF

It is worth noting that 9999 in the middle of the server seed does not translate to chappe code, hence the question mark.

The Overworld Altar

Believed to be a one-time resurrection that pulsed for a time, it has subsequently been destroyed by the community in pursuit of knowledge.

The End Shrine

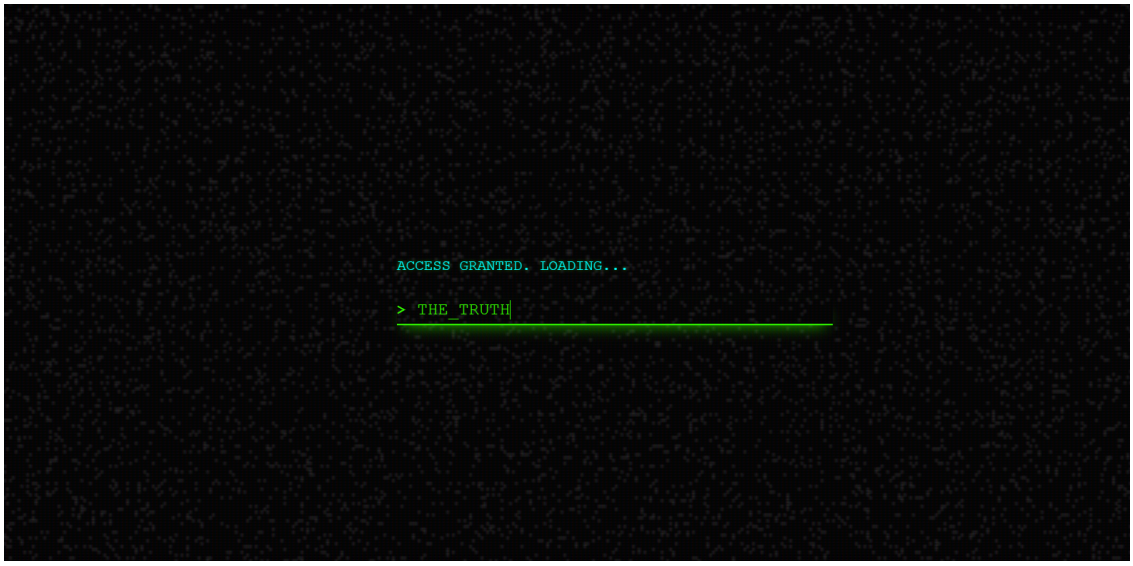
It was initially thought that the End Shrine was the “it” that we were looking for. The shrine has since been heavily damaged. However, the server description changed and then changed again to emphasize “find. it.” indicating otherwise.

blackfile-index

Website Link: https://www.blackfile-index.org/
See this tab for how this website was found: Minecraft Server
See this tab for info on the windows 95 desktop environment: WIN95 UPDATE

Terminal Passwords:

- The password “THE_TRUTH” was found after inspecting the website javascript. Initially it only gave the text “ACCESS GRANTED. LOADING…” without redirecting, but on January 6th the code was changed to hide the password and redirect the user to a windows 95 desktop.



- Typing “help” into the password box gives the response “There is no help for you here”. Finding a second working prompt means there are likely additional currently undiscovered words that cause reactions from the site.

Read Me Page:

A readme file was discovered at https://www.blackfile-index.org/README.md and believed to have been accidentally left in. However, the text began counting down daily starting on 12/30/2025

```
Day 0: # 4kind-arg
Day 1: # 3kind arg///it=notfound
Day 2: # 2kind arg///it=notfound
Day 3: # 1kind arg///it=notfound
Day 4: # 0kind arg///it=notfound
```

One day after the countdown reached 0 this message appeared:

```
0kind
It=stillnotfound
Sacrifice.complete=true
Initializing message...

"If I'm lost, the backup coordinates can be found on Earth near where east meets west: An ancient sea bridge, an island between B and C, bodies both. I have a yankee sixth sense about it. Two ivory towns. Carry the cross into the Mine, just the whole numbers, sixty three times raise the parallel, just twice the long."
```

The consensus is that the most likely explanation is that this is pointing to an island in the Bering Straight (either Little Diomede or St. Lawrence) and saying that we need to convert the coordinates of that island into minecraft. However as it is not solved alternative explanations should be considered possible.

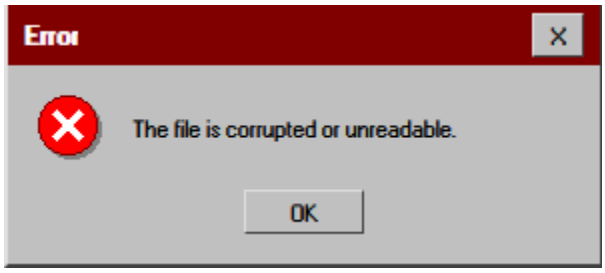
This riddle is not solved to this day.

WIN95 UPDATE

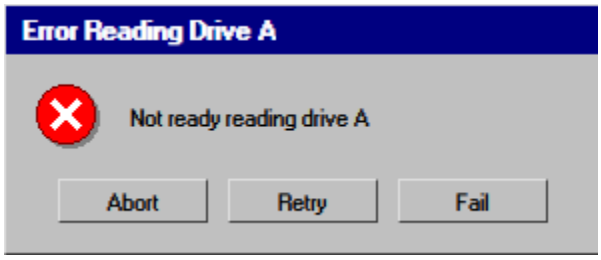
WINDOWS 95

- On Jan 6th the website was updated so that the terminal password “THE_TRUTH” now sends users to a windows 95 desktop environment.
- Various files and folders are accessible but they are coded to appear corrupted/inaccessible. (see following images)

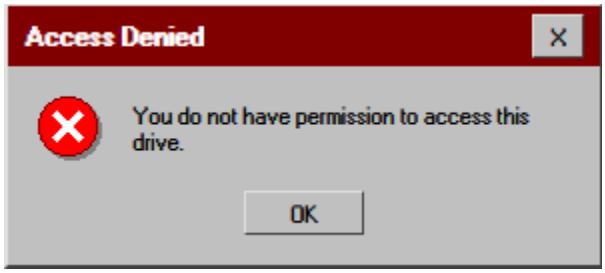
Corrupted file error



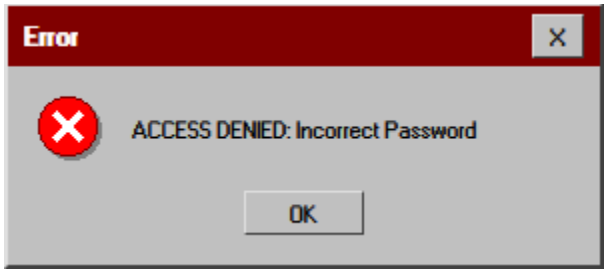
Error Reading Drive error



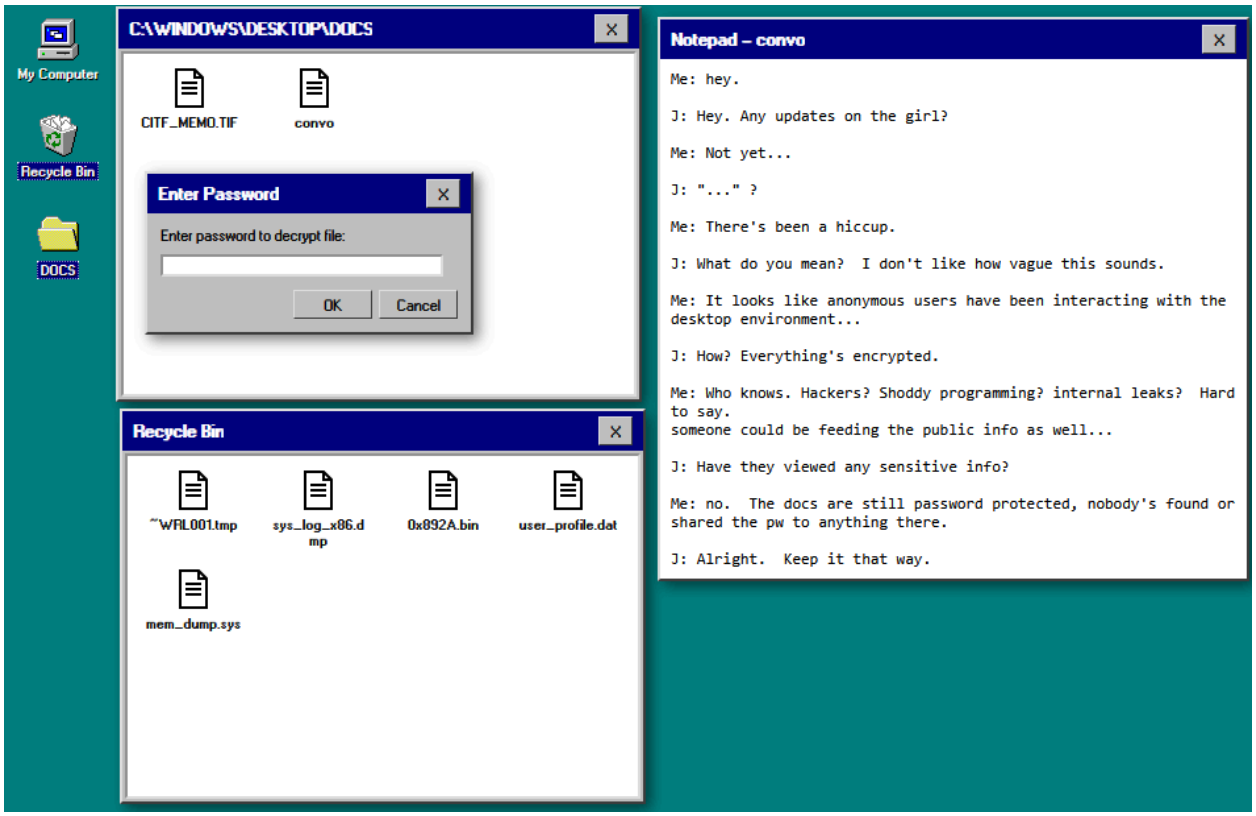
Access Denied error



Incorrect file password error



Desktop accessible tabs:



Current status

As of March 24th the open mysteries with this website are the following:

- The password for the **CITF_MEMO.TIF**
- The broken cursor
- Whether the filenames in recycling bin are relevant
- Whether or not there's another password for the terminal screen
- Check the following tab for the most recent website progress: Konami Code

Folder Items

- Recycle Bin\~WRL001.tmp → Corrupted file error; rather similar to ~WRL0001.tmp which is an older version of Word temporary file of the format: ~WRL####.tmp (purpose unknown)
- Recycle Bin\sys_log_x86.dmp → Corrupted file error; (purpose unknown)
- Recycle Bin\0x892A.bin → Corrupted file error; 0x892A.*bin* could suggest hex->binary which is 1000100100101010 (purpose unknown)
- Recycle Bin\user_profile.dat → Corrupted file error; (purpose unknown)
- Recycle Bin\mem_dump.sys → Corrupted file error; (purpose unknown)
- My Computer\(A:) → Error Reading Drive error; (purpose unknown)
- My Computer\(C:) → Access Denied error; (purpose unknown)
- My Computer\Control Panel → Access Denied error; (purpose unknown)
- My Computer\Printers → Access Denied error; (purpose unknown)
- DOCS\CITF_MEMO.TIF → Enter Password prompt; may be referring to Criminal Investigation Task Force - Wikipedia (current focus, unknown)
- DOCS\confo → newly observed on February 11th, 2026, opens a simulated notepad that appears to contain a conversation discussing our attempts to solve the ARG

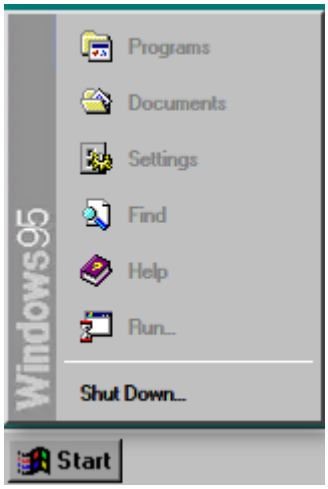
Broken cursor

On both css's for the terminal and for the desktop, there is a cursor object that does not render. Many attempts have been made at visualizing it or deciphering it. It's unsure whether or not this cursor is a red herring or has something encoded in it. Additional info can be found here: broken cursor

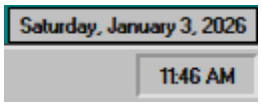
Other Interactions

- Initial login plays Windows 95 login sound.
- All errors trigger the same error sound effect

- Clicking the Start button only allows the user to click Shut Down… which returns the user to the terminal page.



- Mouseover on time shows the local date.



broken cursor

Researched and written by Makedonski_cf

1. I took a Base64-encoded string from the website's styles and then decoded it into binary format.

2. I learned the ICO file structure (https://en.wikipedia.org/wiki/ICO_(file_format)) and started parsing the file byte by byte.
As a result, I learned that the ICO file stores an image in BMP format and that the icon size is 32×32.
The problem was that the data in the header contradicted itself, but since this information is not critical (it is duplicated inside the BMP), I simply skipped it and proceeded to parse the BMP.

Important: ICO files contain two images — one is the actual image, and the other is a mask that determines which pixels are transparent.

3. I learned the BMP file structure (https://en.wikipedia.org/wiki/BMP_file_format) and also started parsing it byte by byte.
Here I encountered the same issue: the headers contained contradictory information.
The only confirmed value was the icon size — 32×32.

I tried to determine the beginning of the image data, but with corrupted data this is not entirely possible: images may use a color palette of varying size, or there may be no palette at all. Therefore, I chose the minimum possible offset (according to the BMP version 3 specification) and assumed that the image data started there.

P.S. There is a problem with this approach: we cannot be sure that we selected the correct offset (a single extra pixel shifts all subsequent ones). I provided all possible offset versions (there are 32 of them).

4. A new problem appeared: I do not know the bit depth of the image pixels, since the header contained nonsense regarding this.
However, I do know the image size (32×32 image + 32×32 mask = 32×64), as well as the number of remaining bytes.
506 bytes × 8 bits / (32 × 64) ≈ 2 bits per pixel.
It does not divide evenly, apparently because 6 bytes are missing somewhere. So I added six zero bytes at the end of the image.

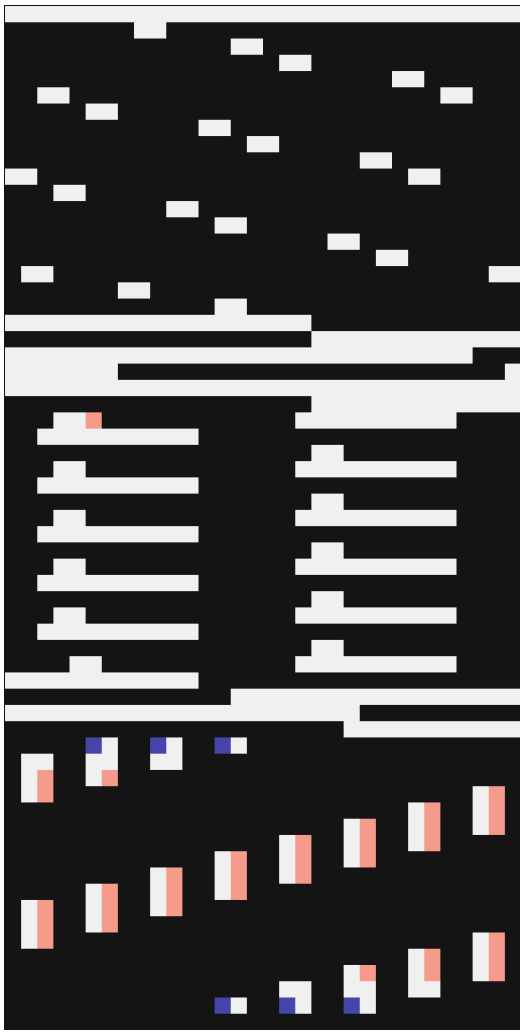
Now we know that the image uses 4 different colors, so I selected an arbitrary palette:
#161616
#ab4646
#8f9bf6
#f0f0f0

5. As a result, I had all the necessary information to reconstruct the file. I rebuilt it manually (https://hexed.it/) according to Wikipedia.

However, after reconstruction, it would not open in anything except GIMP. Presumably, this is because I used an outdated BMP format during reconstruction (it is shorter).

P.S. Why did I decode the image as BMP instead of ICO? According to the ICO structure, the second half of the image should be a mask, but this did not match reality.
The mask is supposed to be 1-bit and have padding bytes at the end of each row (so that it has the same row width as the original image).
Since, according to the data, this was not the case, I decided that the best solution was not to ignore the mask, but to include it as the second half of the image instead.

Preview of “cursor” image:



Archive with all possible offsets: cursor

Update by Makedonski

I've been struggling with the cursor for a few days now (I'm 75% sure there's something there), so I'll post it here.
I ran RLE on the bitmap data and got the following sequence:

```
53 3 5 3 5 3 52 4 4 4 4 4 52 3 5 3 5 3 53 3 5 3 5 3 53 3 5 3 5 3 53 3 5 3 5 3
53 3 5 3 5 3 53 3 5 3 5 3 53 3 5 3 5 3 53 3 5 3 5 3 53 3 5 3 5 3 53 3 5 3 5 3
53 3 5 3 5 3 53 4 4 4 4 4 53 3 5 3 5 3 76 66 48 60 48 4 24 20 46 4 26 20 46 4
26 20 46 4 26 20 46 4 26 20 46 4 26 20 46 4 26 20 46 4 26 20 46 4 26 20 46 4
26 20 46 5 25 20 46 104 48 60 44 64 52 4 48 4 48 4 54 4 46 4 54 4 46 4 54 4
46 4 54 4 46 4 54 4 46 4 54 4 46 4 54 4 46 4 54 4 46 4 54 4 48 4 44 64 16
```

There are obviously repeating patterns, so I replaced them with letters:

```
53 3 5 3 5 3 = a (sum 72)
52 4 4 4 4 4 = a1  0
52 3 5 3 5 3 = a2 -1
53 4 4 4 4 4 = a3 +1

46 4 26 20 = b   (sum 96)
48 4 24 20 = b0    0
46 5 25 20 = b1    0

54 4 46 4 = c    (sum 108)
52 4 48 4 = c0     0
54 4 48 4 = c1    +2

a a1 a2 a a a a a a a a a a3 a 76 66 48 60 b0 b b b b b b b b b b1 46 104
48 60 44 64 c0 48 4 c c c c c c c c c1 44 64 16
```

After that, I was left with numbers that don't fit the patterns, but I don't know what to do with them.
Maybe someone will see something in this.

Additional cursor info moved here to clean up the doc:

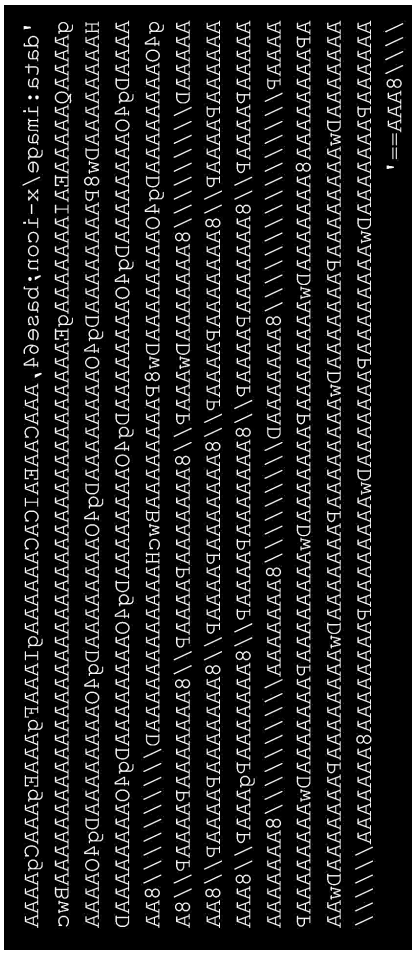
The cursor is stored as base64 and is the following:

```
'
AAEAIAAAAAAAgEAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAABwcHAAAAAAAADw8PAAAAA
AAADg4OAAAAAAAADg4OAAAAAAAADg4OAAAAAAAADg4OAAAAAAAADg4OAAAAAAAADg4OAAAAAAAA
ADg4OAAAAAAAADg4OAAAAAAAADg4OAAAAAAAADg4OAAAAAAAADw8PAAAAAAAAB
wcHAAAAAAAAAAAD/////////8AAAAAAD////////8AAAAAAADwAAAP//8AAAAAAAPAAAAP
//8AAAAAAAPAAAAP//8AAAAAAAPAAAAP//8AAAAAAAPAAAAP//8AAAAAAAPAAAAP//8AAAAAAA
PAAAAP//8AAAAAAAPAAAAP//8AAAAAAAPAAAAP//8AAAAAAAPAAAAP//8AAAAAAAPgAAAP//8A
```

```
AAAAAAP////////////////8AAAAAAAD/////////8AAAAAAA/////////8AAAAAAAAPAAAAA
AAA8AAAAAAADwAAAAAAAAPAAAAAAADwAAAAAAAAPAAAAAAADwAAAAAAAAPAAAAAADwAAAAAAA
APAAAAAAADwAAAAAAAAPAAAAAAADwAAAAAAAAPAAAAAAADwAAAAAAAAPAAAAAADwAAAAAAAP
AAAAAAADwAAAAAAAAPAAAAAAAA8AAAAAAA/////////8AAA==
```

The header designates it is a cursor. The remainder of the header has mistakes in it, primarily the cursor size and where the hotspot is (hotspot is where the computer knows where the ‘hitbox’ of the cursor is or sort of when you click what part of the cursor is used to select the item being clicked).

The broken cursor when viewed flipped and mirrored forms 43

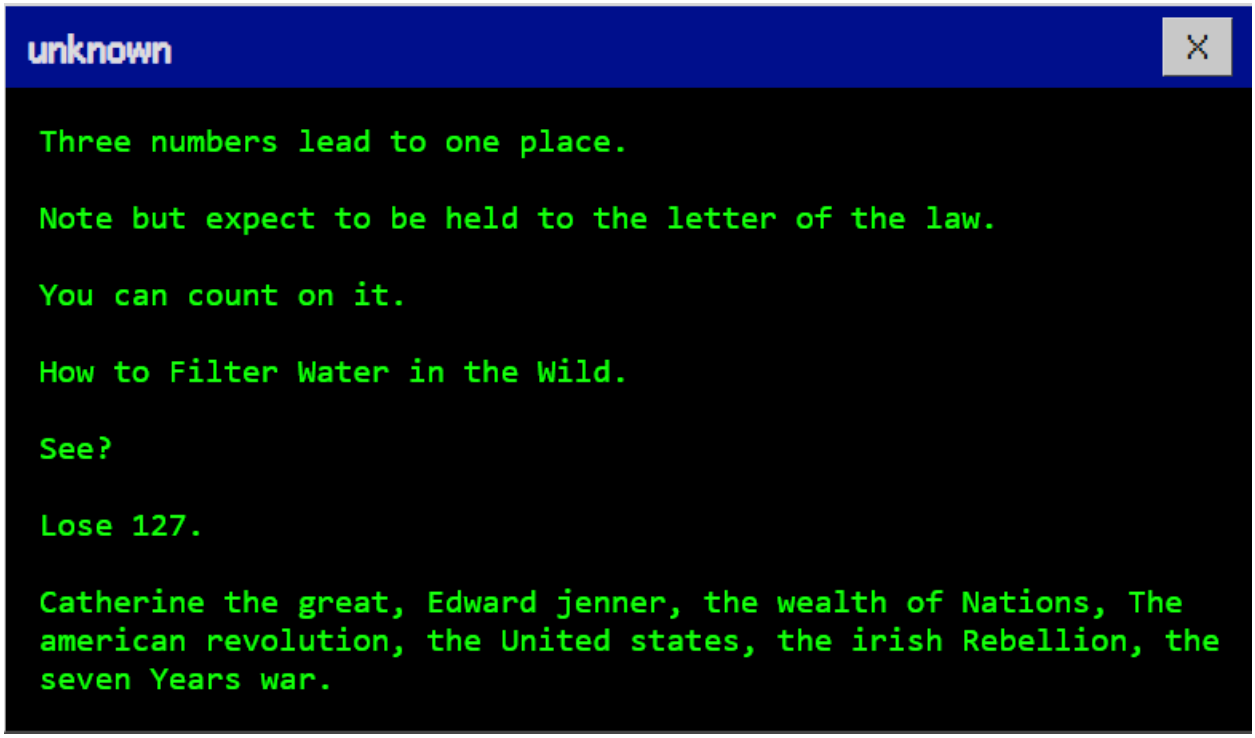


Konami Code

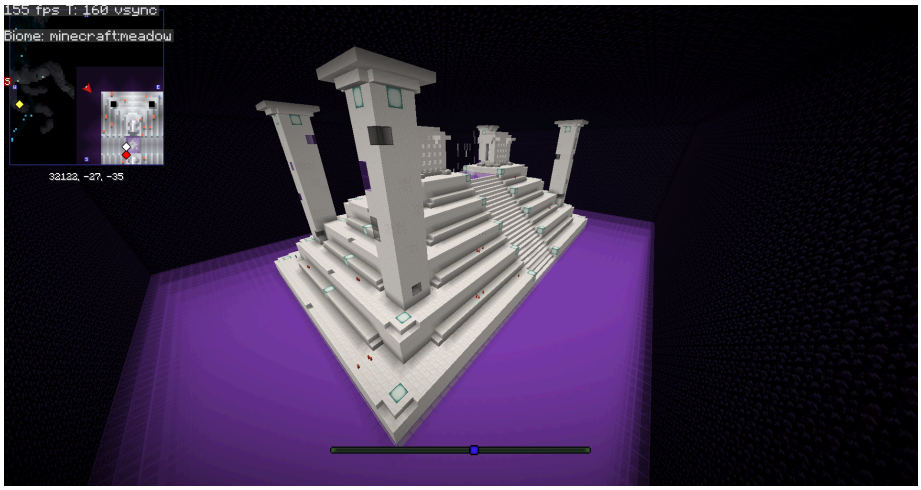
Konami Code

Timeline:

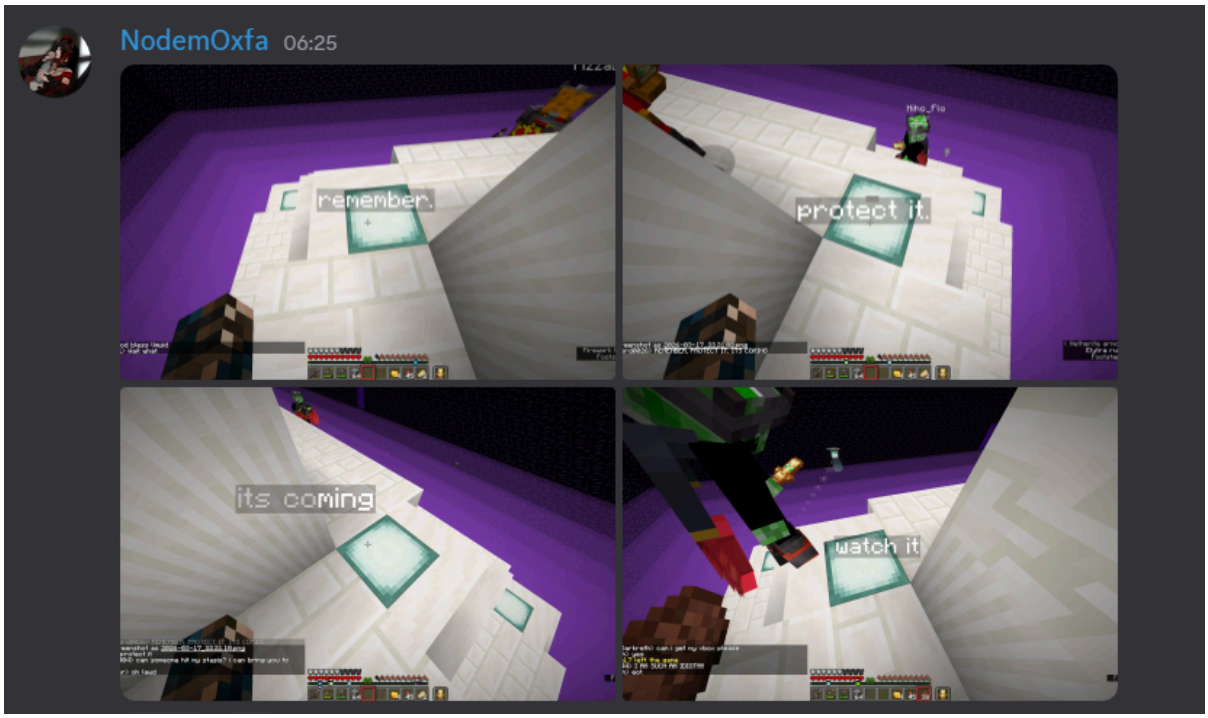
- At 4:41 am central on 3/17/26 the website was updated. You can now input the konami code (up up down down left right left right a b enter) to get the music notes CBACG, and the following message read aloud by a robotic voice:



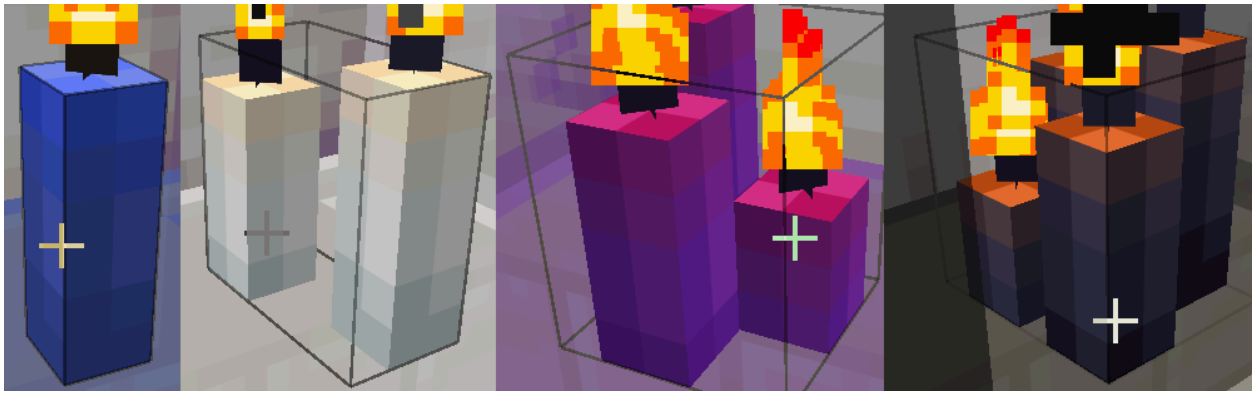
- A structure resembling a pyramid/ziggurat was found by Liquid (liquidwater2 on discord) on 3/17/2026 within an obsidian box. The riddle solution is as follows:
    - X-coordinate (Box bounds are 32116 to 32176):
      The five notes played at the beginning of the message are C, B, A, C, G (all in the 4th octave). When each note is converted to its position in the alphabet, this gives 3, 2, 1, 3, 7, forming the number 32137, so 32137 is X.
    - Y-coordinate (Box bounds are -58 to -22):
      Water is technically filtered by boiling. The boiling temperature of water is 100° Celsius. It also says lose 127, so doing 100 - 127 yields -27, so -27 is Y.
    - Z-coordinate (Box bounds are -45 to 36):
      All the mentioned events from the last segment date back to the 1700s. The capitalization spells out the word CENTURY. 1700s are the 18th century, so 18 is z.



- It is unclear why scanning did not pick up blocks (ex. End rods) within this structure. After checking a large scale regional download of the world created by @aezukla, it was confirmed that the structure has existed in that location since at the latest march 2nd.
- Four slots were open with iron blocks beneath them, so we added four beacons in the slots and activated them.
- The text “remember.” “ Protect it.” “Its coming” “Watch it.” was added to the sea lanterns on the four corners shortly after (using invisible armor stands), at or before 7:21 PM PST on 2026/03/17.



- Candles matching the interior glass slot colors were found around the corners of the structure. It has been theorized that the candles are meant to put the words in order, though the original candle locations and interior glass colors have a different word sequence:



Candles	Colors	Corner text (interior glass)	Corner text (candle location)
1	blue	remember.	protect it.
2	white	watch it	its coming
3	purple	protect it.	remember.
4	black	its coming	watch it

Blackfileindex youtube

Blackfileindex Shorts (yt and instagram)

Searching for “blackfile-index” leads to a youtube channel
https://www.youtube.com/@blackfileindex/shorts

There seems to be an instagram account with the same name that posts the same content.
https://www.instagram.com/black.file.index/

Caution: second youtube short had at least 1.8k views when we found it, **This is very likely unrelated to the ARG**. But worth investigating.

At the time of finding it (Dec 24 3:08 AM PST, reported by fog_runner) the channel had: 1 subscriber, 5 videos (all of them shorts). Short “INCIDENT REPORT #redacted” had 1 comment (“Hello niche community❤❤” from user Notbeau123 who posted it 1 day prior). The short “RESTRICTED ZONE” had 1 comment (“❤️zesdw” from user wendyjazmindeluna8630 who posted it 2 days prior).

Exact videos timestamps (in GMT) by kawai_neko_meow:

Shorts transcripts (by TobiWonKanogy and others):

RESTRICTED ZONE

-- Coordinates : 37.354[ ] [ ], 7.645 [ ]

-- Magnetic interference reported
-- Electronic devices malfunction
-- Headaches reported in children
-- perimeter fenced

SLEEP STUDY / SUBJECT 44

-- Polysomnography initiated
-- No sedatives administered
-- Subject entered REM in 42 seconds
-- Audio recorded during sleep
-- Transcript not included

INCIDENT REPORT

-- Location:Neurology Ward
-- Time: 03:17
-- All monitoring alarms activated
-- No patient movement recorded
-- use undetermined

FIELD OBSERVATION LOG

-- Location: Rural Monitoring Site
-- Automated sensors activated
-- No personnel on site
-- Signal duration : 11 minutes
-- Data incomplete

TEMPORAL RECORD

-- System timestamp mismatch
-- Recorded time advanced by 47 minutes
-- No system restart detected
-- All logs verified
-- Cause undetermined

ARCHIVED INCIDENT

– File Access Restricted
– Multiple sensor conflicts
– Human error ruled out
– Review committee disbanded
– No further action taken

PERSONNEL LOG

Subject failed to report
Access badge last detected on site
No exit record found
Search protocol suspended
Entry archived

SYSTEM RESPONSE LOG:

Anomaly flag confirmed
Automated countermeasures initiated
Manual override unavailable
Monitoring extended
No user notification issued

CORRELATION NOTICE

– Independent systems recorded overlap
– Timeframe alignment confirmed
– Geographic distance deemed irrelevant
– Causal link not established
– Review pending

REDACTED RECORD

– Portions of file removed
– Access level exceeded
– Original author unidentified
– Timestamp integrity compromised
– Record sealed

INTERNAL REVIEW NOTE

– Conflicting entries detected
– Multiple versions of the same record
– Checksum verification failed
– Source discrepancy unresolved
– No correction issued

Revision Notice

-Prior entries marked obsolete

-Replacement record issued
-Legacy data retained
-Synchronization incomplete
-Proceed as normal

Residual Effect Notice

-Anomaly no longer active
-Secondary Indicators persist
-Environmental variance observed
-No mitigation required
-Monitoring reduced

Observer Error Report

-Data capture irregularities noted
-Calibration within accepted limits
-Discrepancy persists
-Observer bias not excluded
-record accepted as-is

System Trace Detected

-Secondary environments affected
-Local data irregularities logged
-Cross-check incomplete
-No immediate action required
-Monitoring ongoing

Room Access Log

-Ward: Internal Medicine
-Scheduled vacancy confirmed
-Environmental shift detected
-Cause undetermined
-Re-entry permitted

Internal Review

-Environment previously marked stable
-No environmental shift recorded
-Residual variance detected
-Source: same location
-Entry accepted

Auto-correction Routine

-Previous entries re-evaluated
-Variance reclassified as noise
-No actionable anomaly present
-Monitoring frequency reduced
-Routine resumed

Status Confirmation

-Environment integrity verified
-No unresolved discrepancies
-Auto-correction successful
-Further review unnecessary
-File Closed

TRANSMISSION RESUMED

- Upload delay acknowledged
- External access interrupted
- Data backlog detected
- File integrity pending
- Monitoring reinstated

FILE STATUS UPDATE

- Previously closed entry accessed
- Access origin unresolved
- Review window reopened
- No authorization record found
- Monitoring resumed

UNOFFICIAL SIGHTING

- Reports submitted by civilian source
- Classification pending
- No response issued
- Entry stored without review
- Follow-up not authorized

ADDITIONAL REPORTS LOCATED

- Similar entries detected
- Civilian sources unverified
- Pattern recognition incomplete
- Archive load increasing
- Escalation not approved

TRANSMISSION ERROR

- Entry received incomplete
- Frame loss detected
- Audio channel unstable
- Partial storage successful
- Resubmission pending

ENTRY RESUBMITTED

- Transmission stabilized
- Previous loss confirmed
- Internal note appended
- DO NOT RELEASE FULL INDEX
- Public access remains active

ENTRY ZONE OUTSIDE AUTHORIZED MAP

- SIGNAL LOSS BEGINS AT KM 3
- DO NOT PROCEED

FILE PARTIALLY RECOVERED

- CONTENT NOT SAFE FOR RELEASE

EXTERNAL MONITORING ACTIVE

- NO INTERVENTION AUTHORIZED

CONTAINMENT PROTOCOL ACTIVE

- ACCESS RESTRICTED

FILE VERSION UNKNOWN

- PREVIOUS ENTRIES MAY BE INACCURATE

UNAUTHORIZED AUDIO COPY

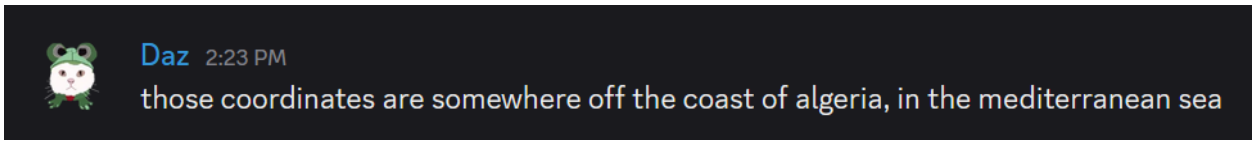
- SOURCE UNVERIFIED

Observation ongoing
(no other text on this one video itself might have some text hidden inside)

SYNC VARIANCE OBSERVED
(no other test, very high pitched noise last second or two)

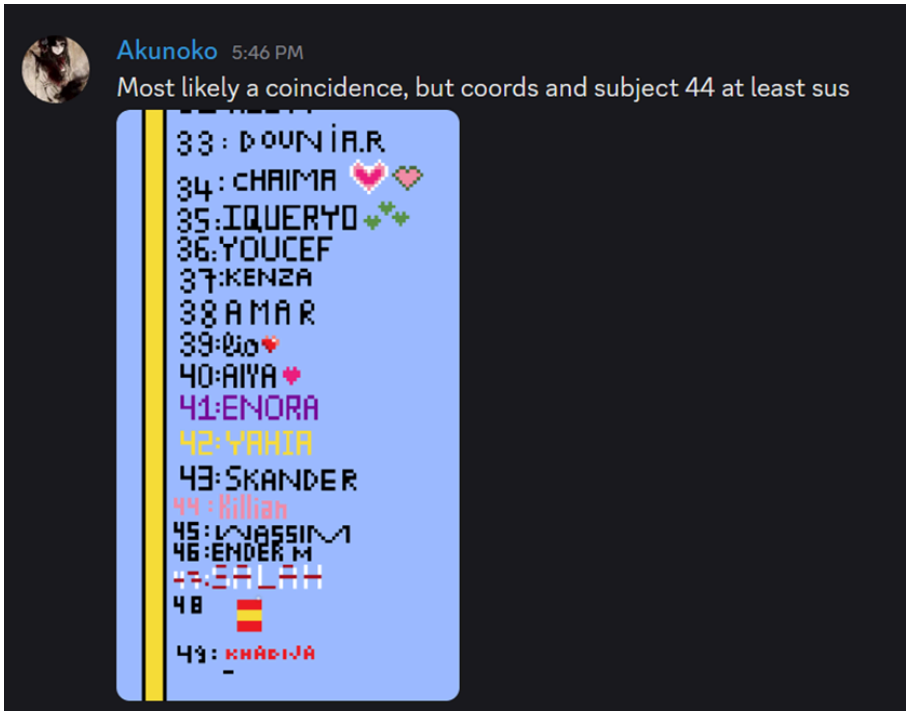
Coordinates 37.354[ ] [ ], 7.645 [ ]

Interpretation №1.



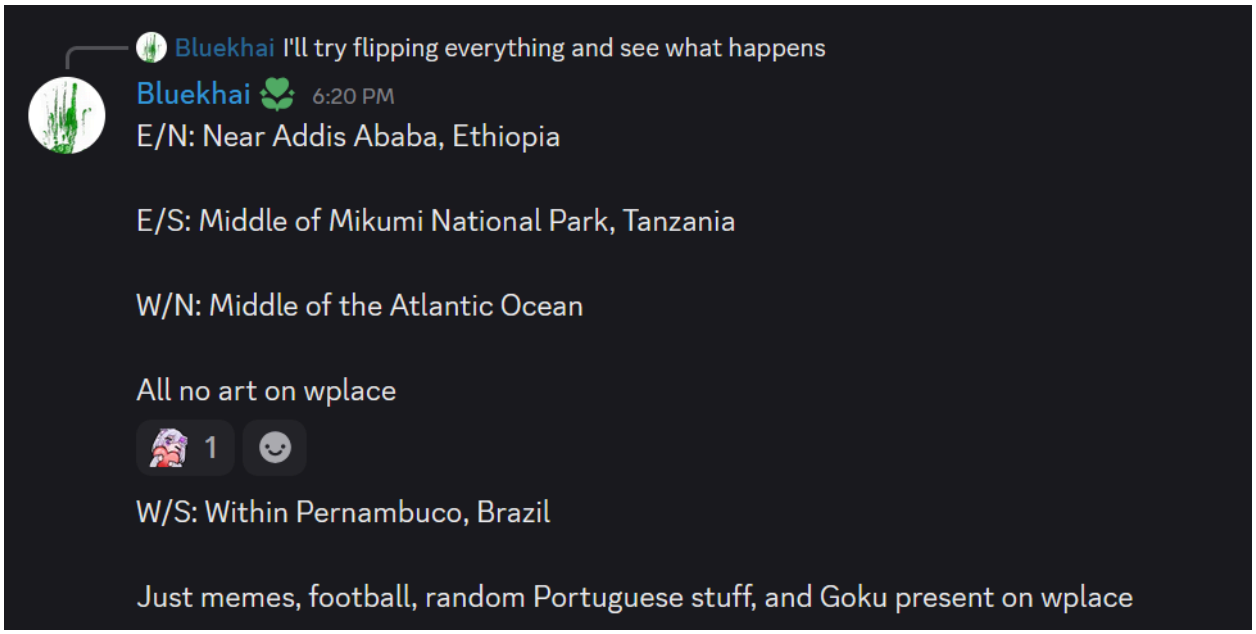
If we look at Wplace similar location, we get this:
https://wplace.live/?lat=37.3786087477428 9&lng=7.5317867780273335&zoom=12.586042469100192

Algeria, a place close to Annaba (sector 5 on Wplace). Image itself:

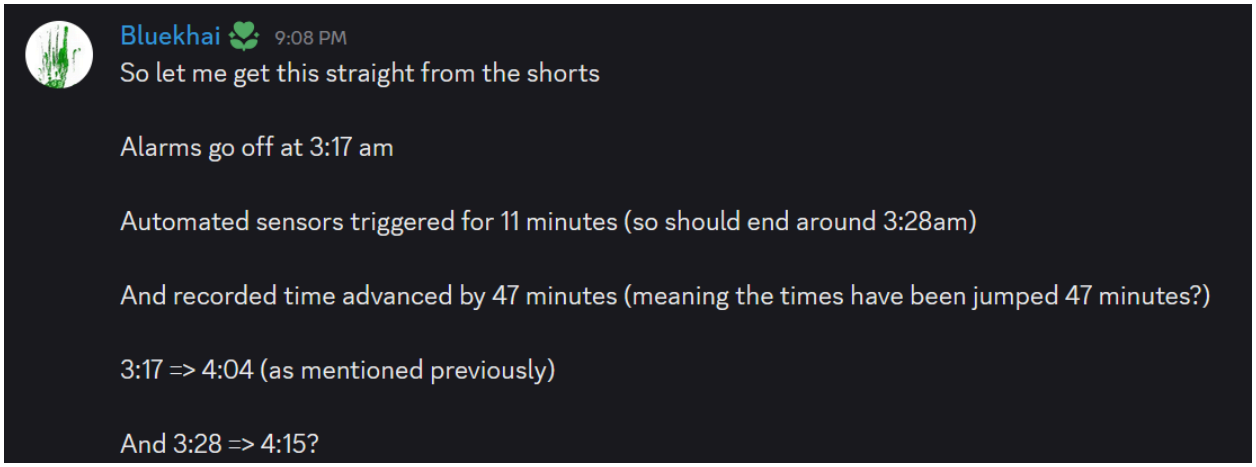


Number 44 is “Killian”. Short №2 talks about Subject 44. Maybe another coincidence.
The pixels of the name “Killian” were painted by user Lunr eclipse #3622068 who has the next image next to their name (according to Wplace). Their discord name seems to be “Lunreclipse.art”.

If we flip the coordinates around:



Possible relevance of time mentioned in shorts

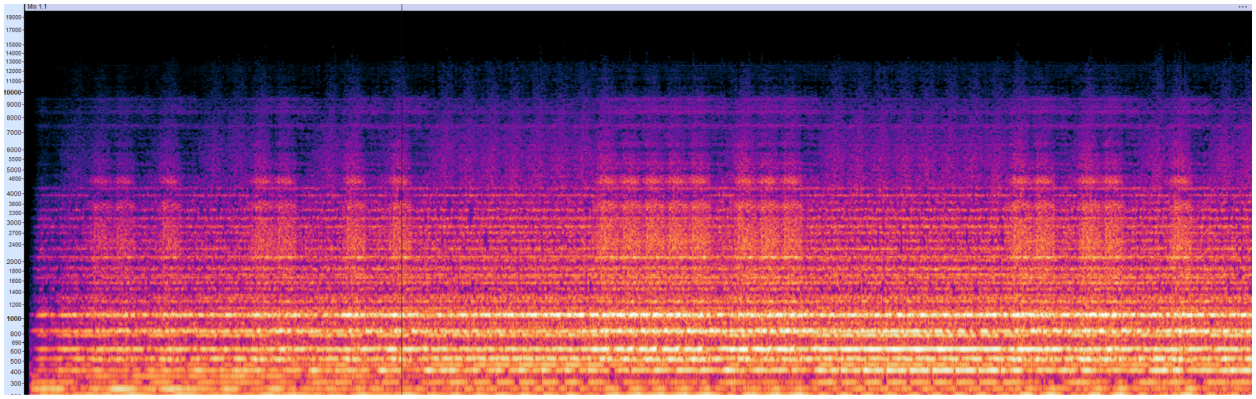


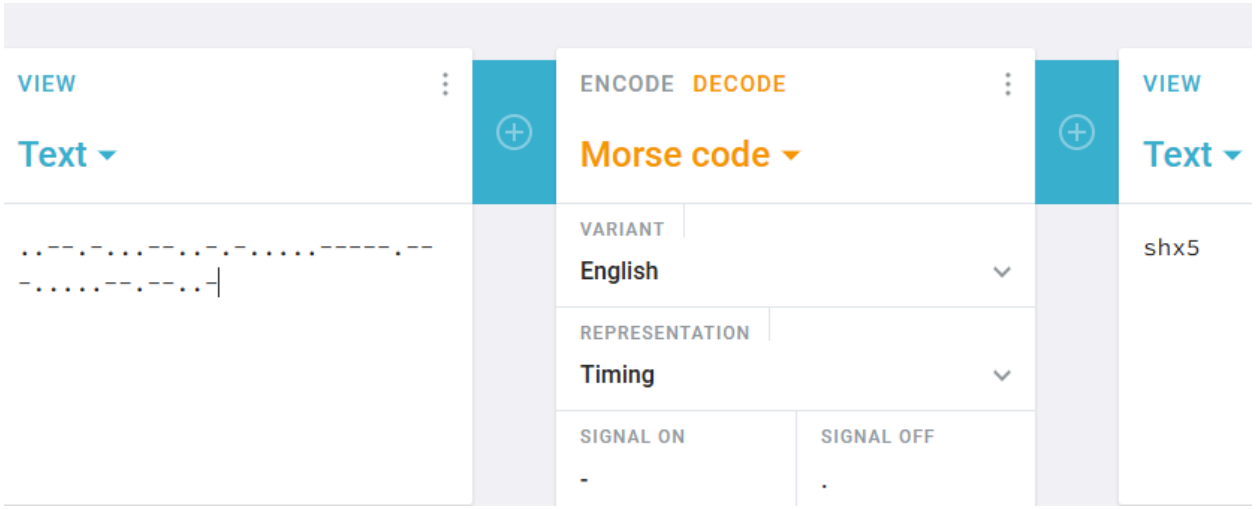
Error 404 (Filian is lost and not found)? Error 415? Unsupported Media Type? (#schizo)

Audio Analysis:

TEMPORAL RECORD:

Inverting one audio channel and combining to mono gives this visual and audible pattern:

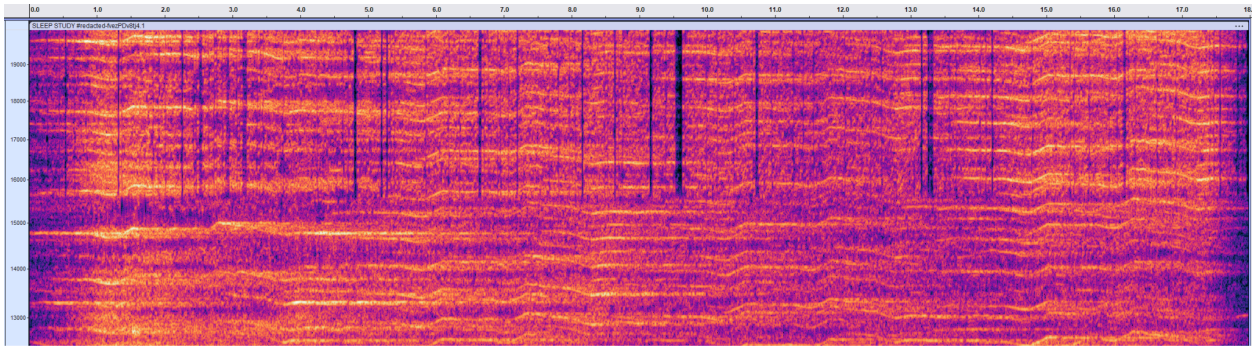




In American Morse this could spell: cio ps iie
Could be 3 different samples. Spelling roughly:
Abccbcabbccabcbcbaaaaaaaaccccbcccabbbbbbbbccaccabcacc
Or Morse: .. . --.. -. . ----- ....- .. ..- .- resulting in: iezne05viua

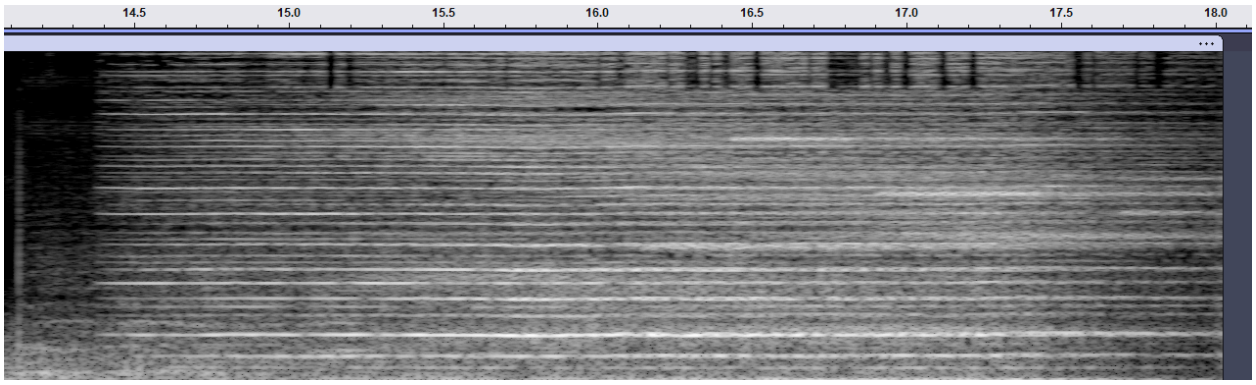
SLEEP STUDY:

Mixing the stereo channels down to Mono will reveal this pattern above 15khz



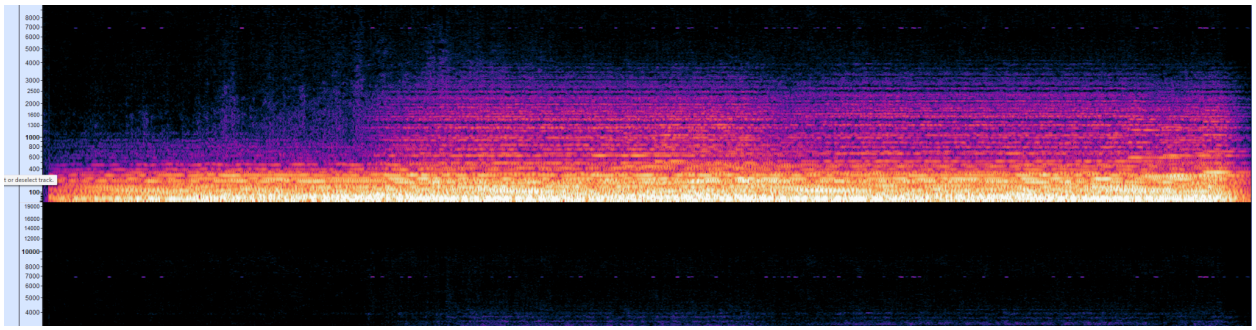
ARCHIVE INCIDENT:

Mixing stereo channels reveals a pattern similar to SLEEP STUDY:

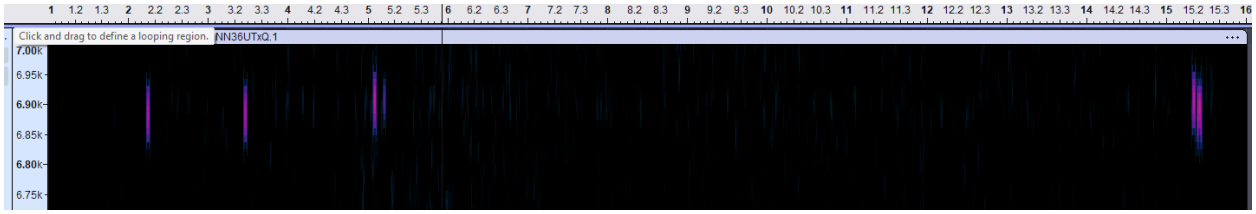


Personnel Log:

Stereo trickery again. Ticking noise at 7kHz:

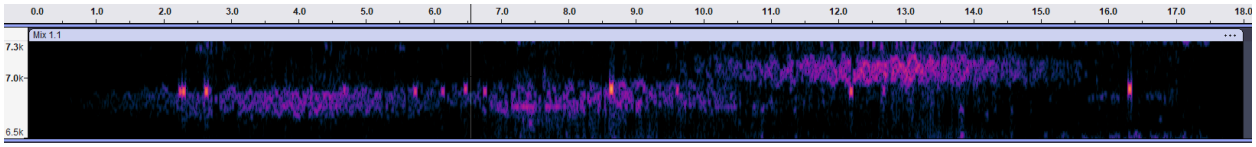


Mixing to Mono destroys most ticks:



SYSTEM RESPONSE LOG:

Again, ticking at 7khz. Stereo to mono mixdown destroys the ticks.



Seems to be spelling 24211 or 24111

Attempt #2 at decoding the “Temporal record” pattern.

Tried to treat the pattern similar to “6-22-22”. Then if I see one space between two brighter “dots” I treat it as a digit separator, and if there is a larger space between the “dots” I treat it as a space between two different numbers.

Applying this logic I got: 21 2 11 53 22 1.

Applying a geohash decoder to this sequence gives coordinates Lat (λ) -37.77506500482559, Lng (φ) -179.95433270931244, just water to the right of New Zealand. Wplace also yields nothing.

Applying the default polybius grid (and rearranging the sequence into 21 21 15 32 21) yields FFEMF. If I delete single digits and apply the grid to the sequence 21 11 53 22 I get FAXG.
(anyone wants to consider the use of virtual fax machines? :schizo-clap:)

Not much of anything right now.

Attempt #3 at decoding the “Temporal record” pattern.

Here is the string of symbols I get when I look at it.
---..-.---..--.-.--------.....-...---------..-..--.--- (total of 54 symbols).
(“-” as darker segments, “.” as brighter segments). If I also try to decode it with “timing” representation in cryptii.com (signal on as “.” and signal off as “-”) I get “sh x 5”. The difference from the original version is just 2 additional spaces.

So next I transformed the string into binary 000110100011001010000000011111011100000000011011001000 (“-” into “0”, “.” into “1”). Tried to separate it into several different combinations and turned the result into decimal. Decimal for the original string is 1843469210355400.

Separated into 2 strings:
00011010001100101000000011 11101110000000011011001000
Decimal: 137340915 124782280

Separated into 3 strings:
000110100011001010 000000011111011100 000000011011001000
Decimal: 26826 2012 1736

Separated into 6 strings:
000110100 011001010 000000011 111011100 000000011 011001000
Decimal: 52 202 3 476 3 200

Into 9 strings:
000110 100011 001010 000000 011111 011100 000000 011011 001000
Decimal: 6 35 10 0 31 28 0 27 8

Into 18 strings:
000 110 100 011 001 010 000 000 011 111 011 100 000 000 011 011 001 000
Decimal: 0 6 4 3 1 2 0 0 3 7 3 4 0 0 3 3 1 0

And 27:
00 01 10 10 00 11 00 10 10 00 00 00 01 11 11 01 11 00 00 00 00 01 10 11 00 10 00
Decimal: 0 1 2 2 0 3 0 2 2 0 0 0 1 3 3 1 3 0 0 0 0 1 2 3 0 2 0

Tried to apply base 26 cipher and some other variants to a few examples but wasn't too thorough. It yields number-letter strings, maybe something can be used as a part of yt url or something. I haven't found anything of use yet.
Tried to apply XOR Cipher to everything and got nothing.

The only other idea I have is to use a cipher key from previous steps. Maybe "THE_TRUTH" or something. But it also hasn't yielded any obvious results yet.

UNOFFICIAL SIGHTING:

Theory:

The notes/tempo/key/chord played in the background audio of Jan 30th short "UNOFFICIAL SIGHTING" are significant to the ARG, perhaps they are supposed to correlate with something unsolved, and are meant to point the ARG towards something.

BPM observations:

-Beginning notes tempo 180bpm

-later notes tempo 90bpm

Could be written on sheet music as 4/4 90 bpm

Frequency observations:
NOTE: For this section, I used a recording of the YT short in audacity, and high pass filtered the audio with the settings in Ref 0.1. This was because the base audio has a lot of rumbling bass notes, and they skewed the spectrum plots pictured below.

The section with lower pitched notes goes:

406hz -> G# (x8) Ref 1.1
323hz -> E (x8) Ref 1.2
302hz -> Eb (x8) Ref 1.3
270hz -> C# (x8) Ref 1.4

with spectro analysis, it seems these are not single notes, but chords instead. Additionally, many of the frequencies do not seem to line up with music notes. The frequencies are a little flatter than the corresponding note. Frustratingly, this makes the chords nearly unidentifiable. Many of the frequencies seem to be pitched between notes. Attempting to replicate a chord with true music notes does not sound like the frequency chords. The sound comes out either in the wrong pitch or tone.

The 2nd "note" is the most spectrographically dense, consisting of the frequencies shown in Fig 1.2 the full list of notes that are the closest match to the frequencies are: Eb E G Bb Eb G. This does not match any common chords, and quite frankly sounds displeasing to the ear when played back on piano. The mixed frequencies have a much more "smooth" sound.

The section with higher pitched clear notes goes:

643hz -> E (x4) Ref 2.1
606hz -> Eb (x4) Ref 2.2
481hz -> B (x3) Ref 2.3 *NOTE it kinda sounds like a 4th note begins to play, but I cant tell if it got cut in the YT Shorts looping system or if it was actually 3 notes.

Similarly to the lower note section, the frequencies for the higher notes do not seem to perfectly line up with music notes. They are all slightly off. Some are a wider range of frequencies, Most are slightly flatter than the notes they correspond to the closest. However, the last three frequencies are a little cleaner than the low note section.

Conclusion:
I entered these notes and chords into a website named chord identifier, and was unable to make any combination that makes a recognizable chord or key. This is the end limit of my musical knowledge. I am at the end of my abilities for this topic. :/
-Ratwagonz

URL For chord identifier -> https://www.scales-chords.com/chordid.php

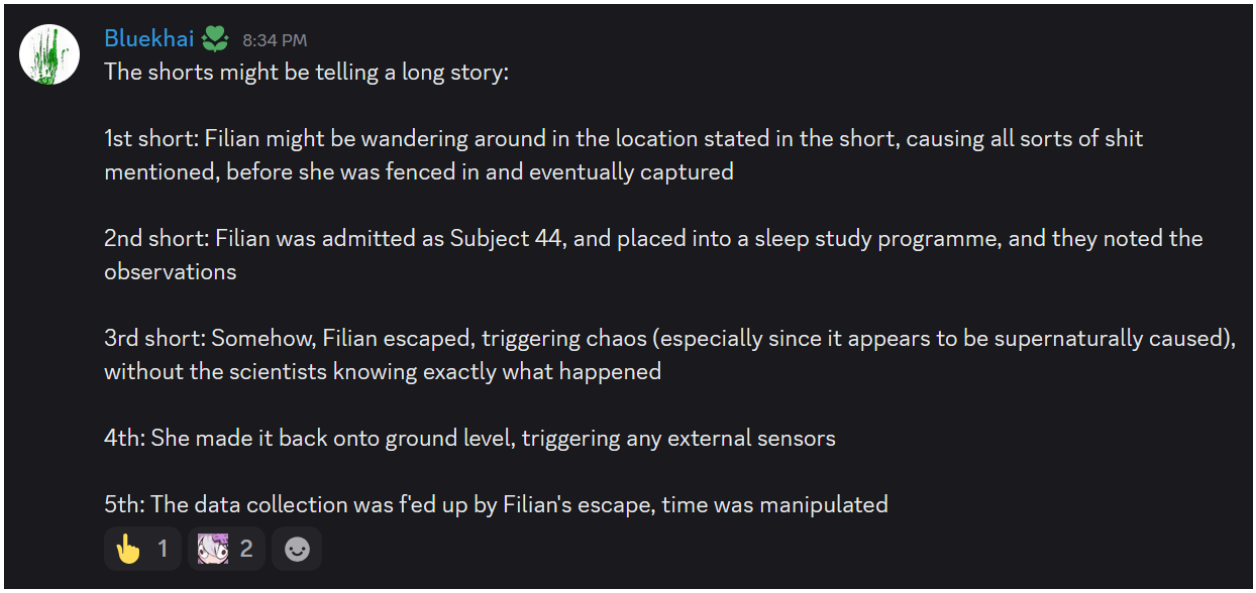
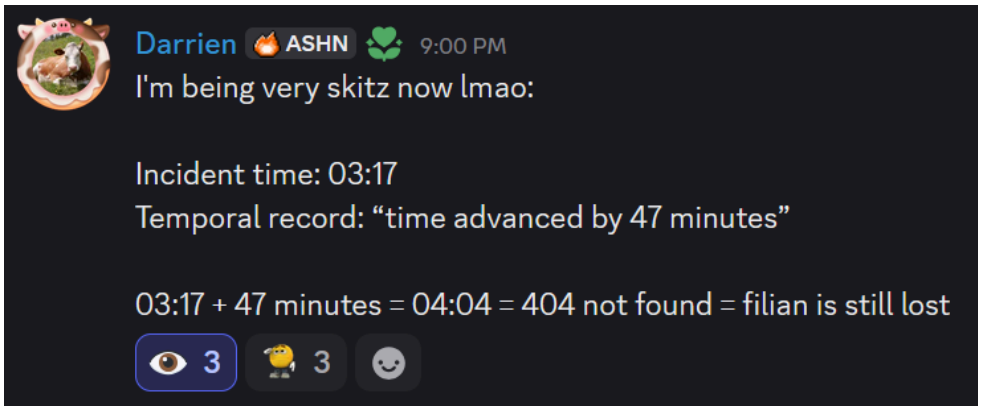
Shorts narrative ideas

Maybe something of use, maybe schizo. Choose yourself





Theories

Theories:
So what if Filian is an AI?
Do any of the glitches make a MIDI arrangement?
CHANNELS ON STREAM COMMENTING MAY BE LINKED TO ARG
Check Wind Audio, could be stretched song, common ARG tactic.
This is likely to lead to Filian getting a new model.
It sounded too consistent to be a song ngl
^Incredibly slowed audio always sounds very consistent
^^True, but it could be a low ambient track.
^^^Doesn't hurt to check
-- wind and water audio from the first stream has been sped up and doesn't sound like anything.
Water at 10x speed sounds more watery, wind has nothing.
There was some weird beeps and boops might be morse code or something
^ speed up 50x the last audio (low ambiance (ominous)). Does it sounds like the cicadas?

Song Lyrics?:

Time is up
Is it really over
one day..
in another life?
Maybe?

"'End of Minecraft Marathon, distorted outro video played. v=yKYgQrogPEI hidden in distortion.

https://www.youtube.com/watch?v=yKYgQrogPEI leads to unlisted video on a different channel, @isitreallyover or "Time is up"

Channel description is: vul khf... pu huvaoly spml? thfil?

Using Stick7 (an increasingly common catchphrase during the marathon) as a clue we can shift this 7 digits as a Caesar Cipher to get: one day... in another life? maybe?

Channel PFP has hidden HEX code in what appears to be an eye: 69 20 74 68 6f 75 67 68 74 20 69 20 68 61 64 20 6d 6f 72 65 20 74 69 6d 65

Which decodes to: i thought i had more time

The channel started livestreaming with various low volume sounds. Stream description eventually changed to: 01101001 01110100 01110011 Which in binary is: `its`

TITLE CHANGE: 325113155552413553
With a polybius cypher it wields: MVCEZWQPX
When used in a vigenere-cipher with the key “cryptii” it yields “Keep Going” (found by ryab4ique on discord)

Looking back through everything I'm going to say there's a reasonable chance this isn't a full ARG. We haven't really had clues lead to other clues and most confirmed solutions were just rudimentary codes. I think the stream is supposed to be more of a teaser than any insane hidden codes considering nothing has come of any audio analysis. Even the dial tone might have just been a default sound used for this. I think all the sound effects together are just some sort of teaser to a new model that will make a lot more sense on debut

"The Yuuki Theory" - liquidwater2 on Discord (Initially posted 12/11/25)

—----------

summary:

This theory posits that Filian is like Yuuki from SAO. She's actually on her death bed and has been piloting a virtual person. Time is up means she finally croaked and now her consciousness has been transported to the digital world. The reason she hasn't returned yet is that there was a system crash which corrupted her, which is why she isn't around right now. We are currently searching for a backup to restore her.

Edit: I think it might be more likely that she is trying to escape something (could still be death) by transferring her consciousness, or at the very least someone doesn't want her to transfer, which explains the knocking, and why she's running in the ARG intro clip, and seems to be transferring willingly. Someone also mentioned in another theory that backslash is the escape character in a lot of programming languages, and backslash has shown up a lot in the arg so far.

She has recently removed the "vtuber in training" from her socials, and has been insisting on streams that she is not a vtuber, but instead an anime girl.

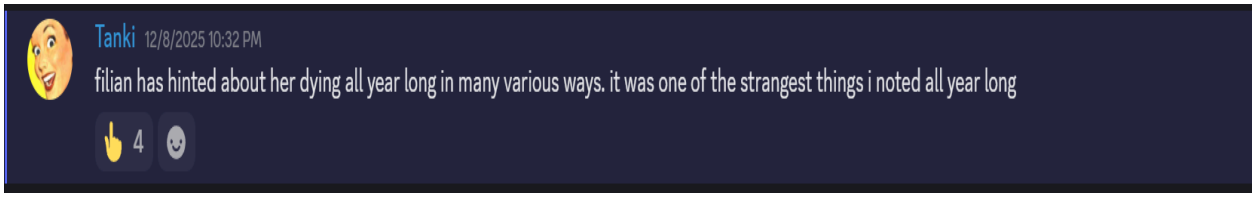
The channel description says "In another life", implying that a current life is ending.

Potential narrative explanation for the 114 backslashes and the underscores:
11 represents Filian because of her jersey. 4 represents death, as it does in japan and other asian cultures. This would mean Filian has died. In the first livestream, one of the identifiable noises was a heart rate monitor with a dangerously slow heartrate. If we assume the backslashes represent Filian's death, the 28 underscores in the third stream would be a heart rate monitor flatline. The silence is a moment of silence for the dearly departed, and the following music "clair de lune" is common funeral music. The music in the fourth stream is titled after a tragedy where the main heroine killed herself. —-To be expanded upon.

In the fourth ARG livestream we get a repeated code with the pattern 6:22:22. At exactly that second in the minecraft stream filian dies. The odds of this happening are 0.005%, or 1 in 20,352 making it unlikely to be a coincidence.

//Knocking could potentially be “knocking on heaven’s/death’s door”. This is still pretty shaky.//
//The 3rd livestream, the one with silence and funeral music with the supposed flatline, was public for almost exactly 3 days, which could symbolize a period of death before a resurrection//
//The third video has the character limit of forward slashes. Some people have pointed out that the backslashes could be a descent, the underscores the flatline, and the forward slashes a meteoric rise. Unclear if this is the intent//

Supporting evidence:



Video example of this from 2 months ago:
https://youtu.be/Z5CC1MmBJVE?t=2954

The only reactions with substance from the minecraft stream:

Part 5: In response to a glitch, she says “I’m not long for this world”.

4:26:45	**Glitch** - “abelebelebele, I think this has gotta be the run, I am not long for this world”

Part 7: In response to a glitch she says “It’s not lookin’ good”

7:27:45	**Glitch** - “oh frick I’m outta time guys, I’m really glad we finished it in 4 days cause it’s not looking good”

Yuuki Theory Expansion #1 - 2/22/26

This is a quick update to the theory which incorporates new information that has been gained in the past few months. One major question that the previous segment fails to answer is “If she

transferred to digital why is she still gone? Why isn't she back yet?". She never woke up from the data transfer. The process was incomplete. This is because the system/network transferring her data crashed mid-way through. We know that the windows 95 environment we have access to went through a crash. We have several corrupted files in the recycling bin, a few of which are confirmed to be created when a crash takes place. Filian's data was also corrupted during this crash. The people facilitating this transfer needed to restore the missing data, so they started extracting her personality and memories from her youtube channel, which is why hundreds of videos and all posts are gone, and why it is getting darker/staticy. The question "any updates on the girl" asked by J is referring to whether she has woken up or been restored by the extracted data. Us snackers on the other hand have an alternate route to a solution. An unknown entity has offered us aid. "If you want your fallen a sacrifice must be made". While at the time this seemed to be an unplanned helping hand offered to us by the gm due to our lack of minecraft ability, I believe there is more to it. Filian is counted among our fallen by this entity. Unfortunately, while our character data was easy to find and restore, Filian's is corrupted. It requires a backup. To fulfil the boon we purchased from it and restore our final fallen, the entity provided us a riddle not for backup coordinates in the sense that the original coordinates were lost, but coordinates TO a backup of Filian. This is why the read me includes the line "Sacrifice.complete=True" as though it was a requirement to acquire the riddle.

(short timeline for reference)
1/22/26 330 videos are removed from the filianislost channel
2/11/26 J and Me Convo drops
2/16/26 303 more videos and all posts are removed from the filianislost channel.

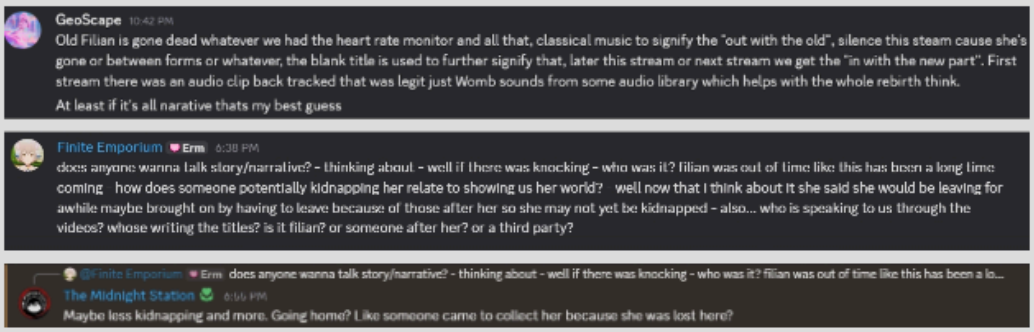
Additional speculation (shaky): The streams at the start of the ARG were the data stream of filian's consciousness being transferred. The messages in the titles and description were not necessarily to us, but thoughts by filian as the process took place. "Keep going, it's happening, closer", however the final of these began to show some cracks as it was displayed backwards. During that stream we got the message "Filian Is Lost", and as mentioned above the following stream had no message. Only a flat line of underscores, silence, and funeral music.

It could also be that Filian is the one that initiated this transfer against the will of whoever is operating this technology, and the knocking is them trying to get in and stop her.

Narrative open ends:
Why did we need a sacrifice/what's with all the altar and temple iconography?
What is J and Me's actual goal? Are they antagonists?
Are the backup and "it" the same thing?

BTW if this pretty much correct but the data transfer was the other way from digital to human I'm still gonna count this as being right XD
—----------

If this is mostly narrative and not technical than figure to compile some pot shots taken at what the narrative is or what the story will turn out to be.



Narratively, it's possible that the 3rd Livestream symbolized a funeral, as the music played is often used in services; this lasted approximately three full days and followed a silent ending of the 2nd Livestream.

A bit of a Meta Timeline:

January 2025 Japan streams:

- First studio tests with "hollywood tracking" and multiple people interacting.
- Likely licensing solution for existing vtuber models
- Experiments with AR stuff, announced but didn't happen.
- Contact to new Model creator?
- Contact to Lore trailer studio.

2025-01-04: 🍊 CHAT SPENDS $1,000 ON ANYTHING IN JAPAN 🍊 IRL in Japan shopping! Using Hollywood tracking today! Also some AR stuff! [Day 2/4 in Japan]

First time going into some details about Debut.

2025-01-13:
First collab back is with Vedal/Neuro
2025-01-24: 🍎 HARDCORE MINECRAFT 🍎 If I die, my world gets deleted. And so does the stream. Goal's to do stuff besides try to beat game. I want a dog

- First time Hardcore Minecraft.
- No further attempts till September

2025-01-29: 🍉[NEW TECH] If I Stop Pedaling My Router, I Die 🍉 Today I hooked my router up to a bike. If I stop pedaling, it turns off. New graphics ya

- Tells Layna about the early storyboard of a Lore video by "a known studio"

2025-05-26: https://www.youtube.com/watch?v=6cu7XqnIlCg

- Confirms debut (model done?)

2025-09-01: https://youtu.be/tAegXiWfaB4?si=ft5XqqYeBZTCyD7A&t=774

Strange yapping about
- Creditscore reveal..?
- Being broke
- Selling the channel

Could this mean she signed a significant contract like buying a property or founding a company?

2025-09-01: https://youtu.be/5eUQvDYkfDw?si=a27DTHoSZxEOyrgR&t=12772

- Early leak of VSoccer. Filming/production likely shortly after this date.

2025-09-13: 🍋 YOU LAUGH, YOU LOSE 🍋 IF I LAUGH, I RAW DOG A BOWL OF MUSTARD. I don't like mustard... Good thing I don't laugh easily! Shoutout to Kend

Massive concentration of ARG related happenings:
- First Hardcore Minecraft training since January
- Confirms Debut, first mention of 'My world'
- First Wplace look

2025-10-06: https://x.com/filianIsLost/status/1975306378681213346

- Last timeplan posted, shows HC Minecraft for October 10th, lasting 2 days which did not happen.

We can assume something caused the HcMinecraft stream (which likely was planned as start to the ARG and debut) to be pushed back for 2 months. The following 2 months of stream seem slightly derivative, like filler content.

2025-12-02: VSoccer

Distance from mention (2025-09-01) : 92 days.
Distance from planned HcMc Date (2025-10-10): 53 days

Initially on the Livestream 2 page uncredited:
The 114 '/' Theory:
The song is "Aria Variata, BVW. 989 - Variation No. 1" The only other thing that related the number 114 to this song is "**Minuet in G major, BWV Anh. 114**". The song was originally written by Christian Petzold, but was popularized by S.Bach. This song is in **G Major** which might be a hint later on idk but it's gotta be related to the fact that the title of the livestream was Minor A.

I don’t yet really know how this relates but the words **Minuet** or **G major** or **Petzold**(OG creator) or **Anna Magdalena**(The piece is part of the notebook that Bach wrote for his wife) might be important.

"Why Backslashes? The 'Escape' Theory" The use of 114 backslashes (`\`) is not random. In programming, `\` is the **Escape Character**, suggesting the entity is trying to 'break out' of the 114 (The Bach Minuet). Also `\` is used for **Windows Local Paths**, while `/` is used for Minecraft and URLs. This confirms the entity or Filian is trapped in the **System OS**, not the game, supported by the 'Windows Ding' sound heard at 49:48." *(This is just my theory tho, might be completely wrong)*

A variation on this is that 114 is decimal in ASCII for ‘r’ and ‘\r’ is a Carriage Return special character. This is used in Windows to denote a newline in the sequence ‘\r\n’ (‘Carriage Return’ followed by ‘Line Feed’). Reference: https://en.wikipedia.org/wiki/Newline

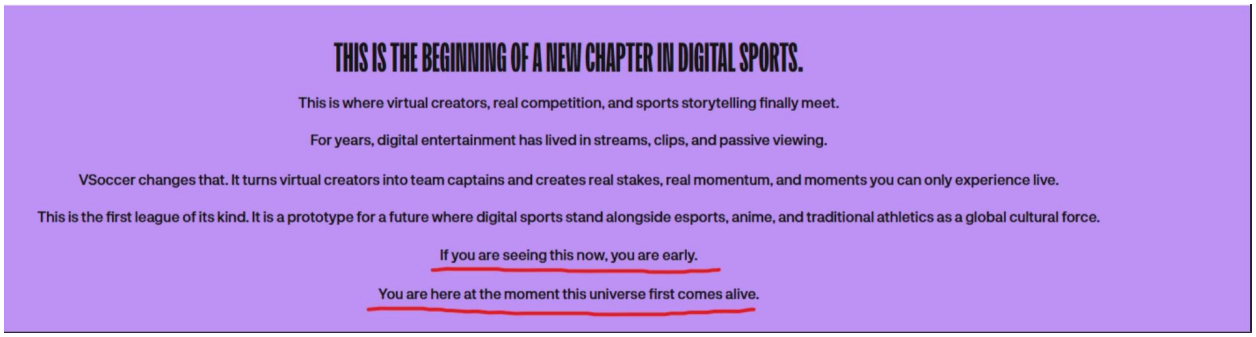
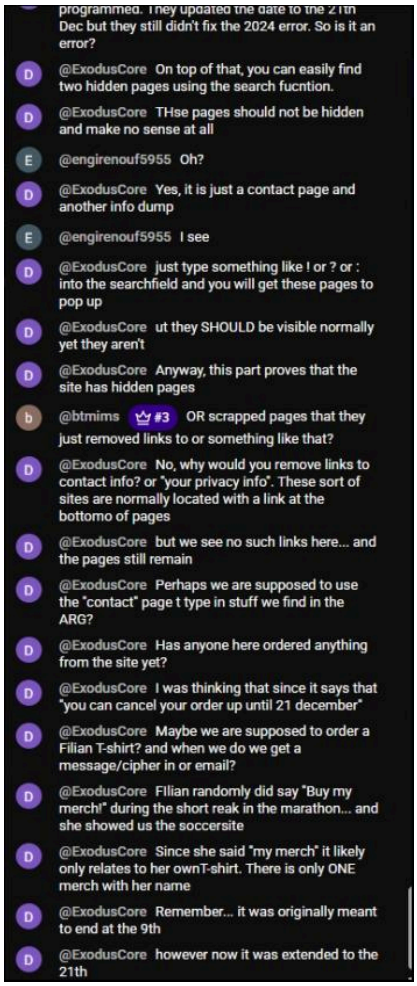
relevant sites

The following is a list of websites/urls/sources besides youtube that may be relevant in the arg.

The Vsoccer website, as pointed out by **ExodusCore** in the youtube livestream chat of the third livestream contains potential references to elements of the arg;
https://vsoccershow.com/

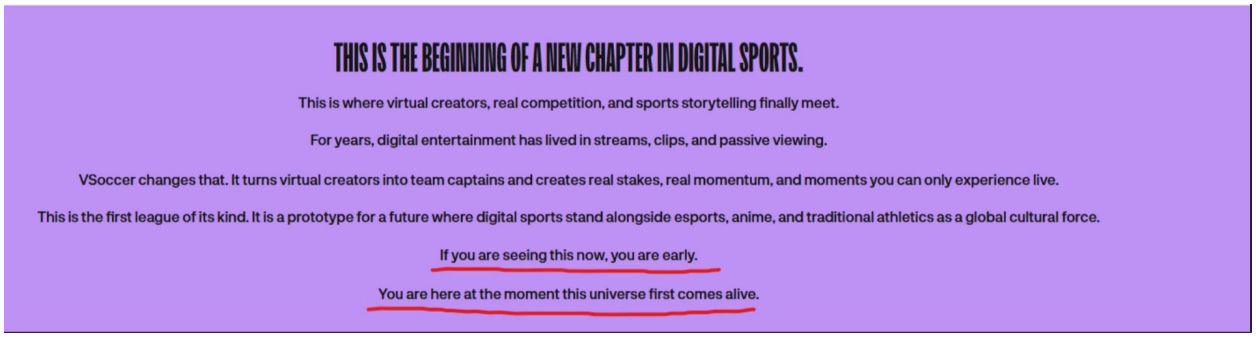


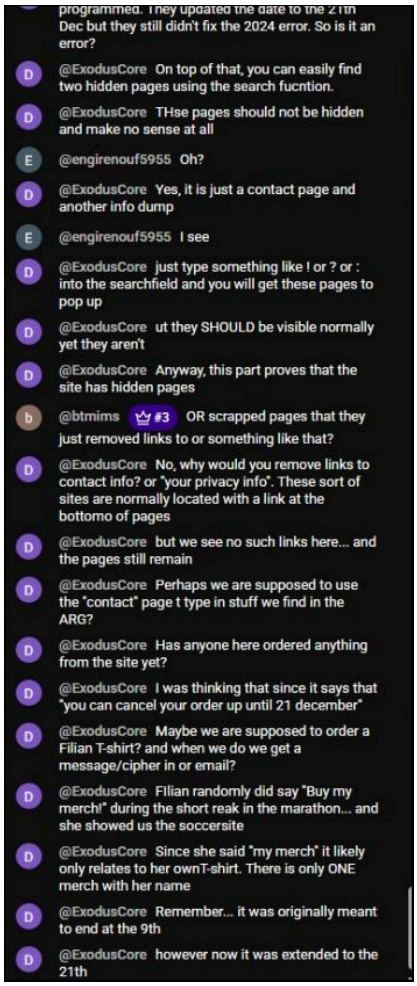


(screenshot credits: **ARP_Kioshima** on discord)

vsoccer

The Vsoccer website, as pointed out by **ExodusCore** in the youtube livestream chat of the third livestream contains potential references to elements of the arg;
https://vsoccershow.com/





(screenshot credits: **ARP_Kioshima** on discord)

Makedonski:
Checked all site images
Found that:

this means that most likely the number 11 was added during postprocessing, and such a T-shirt does not actually exist.
I have a code that assigns a random color to each color, if the colors are the same, then they had the same color before processing. In real photos, the pixels are of different colors due to noise.
What interesting: it only appears on Filian's green T-shirt, and note that only the number stands out. That is, they had a green Filian T-shirt, but without a number, and a purple Filian T-shirt, but with a number. It's at least weird.

Also, there are only 2 images like model_x_fil:
https://vsoccershow.com/cdn/shop/files/model_1_fil.png
https://vsoccershow.com/cdn/shop/files/model_7_fil.png

Stick Seven ???

The New Filian Is Going To Debut Soon...
Full vod;
Filian, Cotton and Mega Compete at Geoguessr (5/26/2025)

First Mention of Debut Planning in January 2025:
🍊 CHAT SPENDS $1,000 ON ANYTHING IN JAPAN 🍊 IRL in Japan shopping! [1/4/25]
https://youtu.be/Bw--JpoT5n4?si=aGXBsO9iHlfkoI9z&t=6983

Sept 1st, Filian says she will show us her closet when she moves to new place (suggests possibly dynamic mapping of rooms/objects or full apartment mapping in so much detail as to include her closet)
https://rumble.com/embed/v6w6wlk/?pub=4&start=1720

Transcripts:

May 26th clip:

```
when's the face reveal? *big sigh* chat you guys wanna see my real face?!
i'll talk about it. guys, here's some information. as of this morning, based on what
   i have seen of the future filian i'll say *ahem* i am now 100% confident that
   debut is happening. it is going really well. it looks amazing.
a little behind the scenes, chat. a lot of you say, "filian why have you not debuted
   after three and a half years of streaming?"
the answer is simple, from the beginning i've always seen myself as sort of like an
   anime girl. and that's kind of like what i want to be in the future, right?
so with that being said i tried to debut twice! twice in the past but both times i
   was not satisfied with it, so i had to put it down
anything less than the best for you guys is unacceptable
so, chat, i can say though after all this time, i really think we're gonna be getting
   the best this time
```

it took me three years of meeting people learning and a lot of other stuff but i think for the future you guys will be very very excited
now chat, i will be saying this, "filian, *ahem* what are you doing once the model's ready?"
and the answer is, a lot. there is so much more going into it than just my physical appearance
there's going to be a lot more happening
so you know chat, technically we're still in early stages but i'm really excited for it. i know it's happening, and i also think you guys will be um very impressed, i guess
we'll see, chat, we'll see. anyway snackers thats all i gotta say. no dates, no dates
but as of this morning, from what i've seen, i'm now 100% certain this will be what you guys will see

Sept 13th clip:

so guys, i have a quick thing to say, a lot of you guys have been like, "filian debut when?"
ok i i'll say this, chat, it's probably not as far away as you think
but i will also say this, chat, it's not gonna be a normal debut
it's gonna be probably the first time in like fore- definitely the first time but maybe the last time that anyone's ever done something like this
so it'll be a little bit different, chat, instead of just debuting, i've been preparing to show you guys my- my world
a lot of you ask like, "filian, can i ask you questions like you know uhhh like where do you live and stuff?" you know i'm saying?
and you know i usually just say a fruit snack factory, cardboard box, homeless, blah blah blah
but the truth is, chat, i live in an apartment, and i am going to be moving to a slightly bigger one soon
and then i'll be showing it for you guys. i'll be showing you guys the world. so yeah
i've been working on it nonstop in the background and its been very very intensive so i hope you guys will be excited for it
i am working beyond hard for it. its the hardest i've ever worked for anything in my life
so like doing all the streaming stuff on top of it like a lot of its like you know not that crazy
but yeah, i've been working really really hard on something you know special
we've been waiting four/for years for it so yeah i'll show you guys my world i guess
so yeah that's all that's all i wanted to say uhm no dates no dates no no no no no no no no dates
but when i'm done preparing everything, i'll show you guys.
ok, chat? alright? cool? yes or no? is that ok chat? fighting!

Dec 8th clip:

i didn't think it would be this soo-

IT'S HAPPENING!
it's time for me to go for a- for a little while
i (unintelligible)! (maybe "i'm running out of time!")
i really gotta go!
i didn't think you'd ever see me like this
you'll be able to see the world, my world
